1 What is AveStream

AveStream is a cloud-based Content Management System (**CMS**) designed for businesses of all sizes. Its core strength lies in its **scalability**. The platform dynamically adapts to fluctuating traffic demands, ensuring optimal performance during peak periods like seasonal surges, product launches, or viral campaigns.

AveStream is suitable for businesses of all sizes, from small startups to large enterprises, that require a scalable and reliable platform to manage their digital content.

This includes businesses with:

High-traffic websites: E-commerce platforms, online marketplaces, news and media organizations.

Seasonal businesses: Businesses experiencing significant traffic fluctuations throughout the year.

Businesses with rapidly growing content: Blogs, online publications, content marketing agencies.

Global businesses: Companies with a large international audience.

This document highlights key features from a creator's perspective. For additional assistance, please refer to our YouTube help videos.

2 Account

2.1 Register

To create a new account, click the **Register** button. This button is visible only when you are logged out.

Enter your email address. You will need access to this inbox to verify your address during the registration process.

Complete the required fields and choose a strong password. Please confirm your password in the designated field.

Selecting the "Create Sandbox Company" checkbox will generate a sandbox account, allowing you to test all system features. If you only intend to be invited as an author, you can leave this box unchecked.

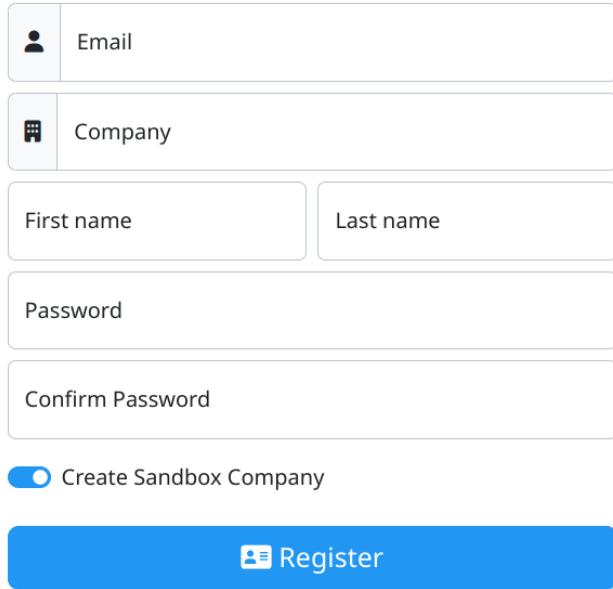

To manage users with access to your customers, navigate to Users under Management 11.2

You will receive an email from the system containing a verification link. If you don't see it in your inbox, please check your spam folder.

After clicking the link in the email, you will be redirected to AveStream.

If you see a success message after clicking the link, you can now login to the system.

2.2

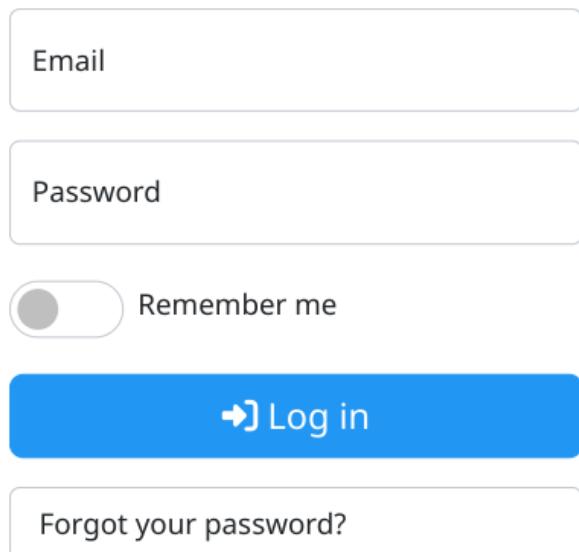

The registration form consists of several input fields and a checkbox. At the top is a field for 'Email' with a person icon. Below it is a field for 'Company' with a company icon. The next row contains 'First name' and 'Last name' fields. Following that is a 'Password' field. Below the password field is a 'Confirm Password' field. At the bottom is a checkbox labeled 'Create Sandbox Company' with a blue checked icon. A large blue 'Register' button with a person icon is at the bottom right.

Please check your email to confirm your account.

Email verified successfully!
You can now [login](#) to AveStream

2.2 Login

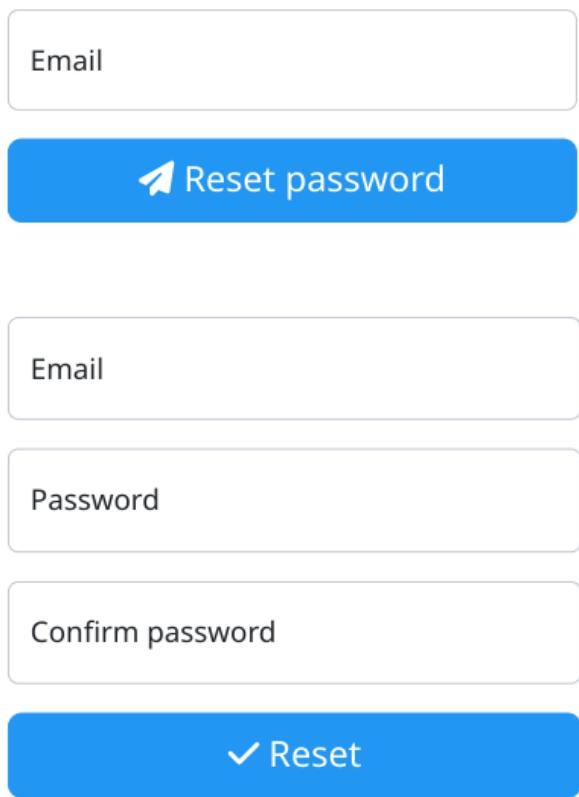

Click the login link and enter your credentials.
For persistent login, check the **Remember me** box.

The image shows a mobile-style login form. It consists of several rounded rectangular input fields and a central blue button. The first field is labeled 'Email'. The second field is labeled 'Password'. Below these is a toggle switch labeled 'Remember me'. Underneath the switch is a blue button with a white right-pointing arrow and the text 'Log in'. At the bottom of the form is a link 'Forgot your password?'.

2.3 Password reset

If you've forgotten your password, click **Forgot your password?**. Enter your email address and click **Reset password**. You will receive an email with a password reset link if you have an existing account

The image shows a mobile-style password reset form. It consists of three rounded rectangular input fields and a central blue button. The first field is labeled 'Email'. The second field is labeled 'Password'. The third field is labeled 'Confirm password'. Below these fields is a blue button with a white checkmark and the text '✓ Reset'.

2.4 Manage your Account

After successful Login, click the **Profile** drop-down and select **Manage your Account** to update your account information.

2.4.1 Profile

Under **Profile** you can update your name and address. This personal information is private and not publicly displayed on the website.

Only your first and last name will be visible on any blog pages you create.

Select your time zone from the drop-down menu.

Our system stores all dates in UTC. If your time zone is not correctly set, you may see incorrect date/time displays.

Select the level of notifications you wish to receive from the system.

| | |
|--------------------------|--|
| | Username [REDACTED] |
| Company | |
| First name [REDACTED] | Last name [REDACTED] |
| Street | |
| Zip | City |
| Phone number | |
| | Your timezone (UTC+01:00) Europe/Bratislava |
| | Notification Level for Mail Information |
| ✓ Update | |

2.4.2 Email

Under **Email** you can change your email address.

Enter your new email address and click **Change email**.

You will receive an email with a confirmation link. Click the link to confirm your new email address.

| | |
|-------------------------|--|
| Email [REDACTED] | |
| New email [REDACTED] | |
| ✓ Change email | |

2.4.3 Password

Under **Password** you can change your password.

Enter your current password, then enter and confirm your new password.

Click **Update password** to save the changes.

| | |
|------------------|-------|
| Old password | |
| New password | |
| Confirm password | |

✓ Update password

2.4.4 Personal data

Under **Personal data** you have two options:

Download Your Data:

Download a copy of the personal data we have stored about you.

Delete Your Account:

This action primarily removes your account from our system.

Important: Deleting your account will not delete any content you have created or shared on the platform.

Your account contains personal data that you have given us. This page allows you to download or delete that data.

Deleting this data will permanently remove your account, and this cannot be recovered.

Download **Delete**

2.4.5 Logout

After clicking Logout, you will be redirected to the start page and logged out of your account.

3 Publishing

After logging in, you can access the AveStream Admin Console by clicking the **Publishing** link in the navigation. The Publishing Console provides an overview of the system's core elements.

3.1 Localisation

The AveStream Publishing console is currently available only in English. However, you can utilize browser-based automatic translation features.

Recommendation:

For optimal translation results, we recommend using a Chromium-based browser (such as Chrome, Brave, Edge).

Firefox Note:

Firefox may not consistently respect "do not translate" settings, which can lead to unexpected translations.

While Firefox can be used with the English version, we advise against using it with automatic translation enabled due to potential issues.

3.2 Top Navigation

1 AveStream Webpage: Access the main AveStream webpage.

2 Customer Selection: Switch between different customer accounts if you have multiple.

3 Webpage Frontend: View the live frontend of your website (root page).

4 Theme Switch: Toggle between Light and Dark mode.

5 Server Notifications: Displays a notification badge with the count of new server notifications. Click the badge to view the notifications in a pop-up modal.

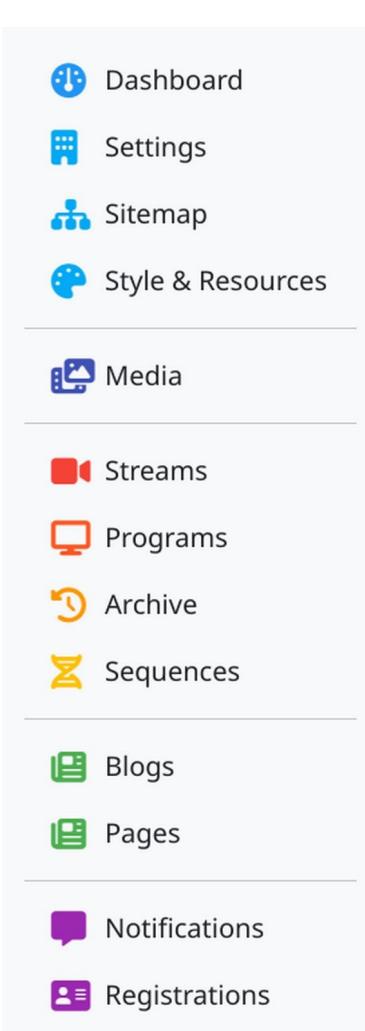

6 Profile: Access and manage your user profile settings (See 2)

3.3 Sidebar

The sidebar allows you to select the specific elements of your website that you wish to edit.

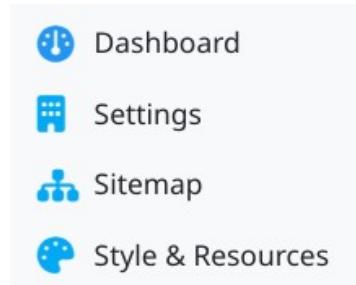

A detailed description of each editable item will be provided later.

| | |
|-------------------|-----|
| Dashboard | 4.1 |
| Settings | 4.2 |
| Sitemap | 4.4 |
| Style & Resources | 4.5 |
| Media | 5 |
| Streams | 6.1 |
| Program | 6.2 |
| Archive | 6.3 |
| Sequences | 6.4 |
| Articles | 7 |
| Notifications | 8.1 |
| Registrations | 8.2 |

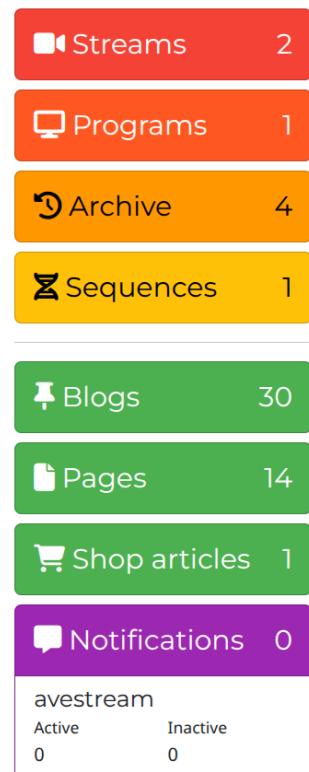

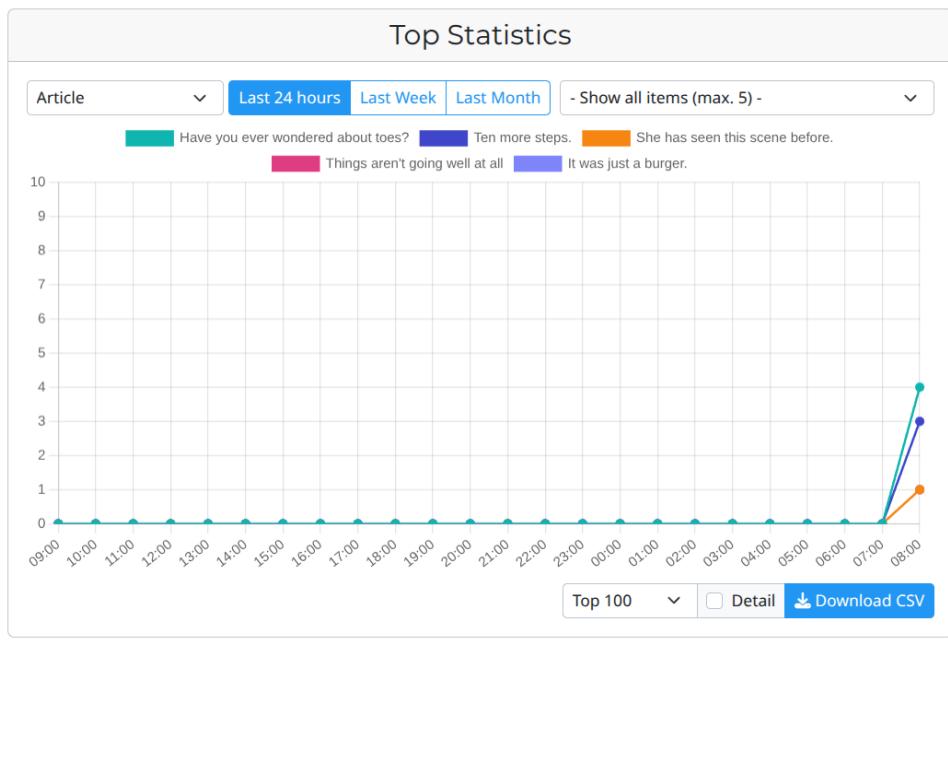

4 Customer

After login, the system will pre-select the first customer assigned to your account. Please ensure you have selected the correct customer before making any edits. You will only see and be able to edit content related to the currently selected customer.

4.1 Dashboard

The Dashboard provides an overview of the selected customer

4.1.1 Top Statistic

Top Statistics displays the most watched items.

| | |
|------------------|---|
| Entity type | Select the type of item you want to visualize from the dropdown menu |
| Statistic range | Choose the time period for the statistics (last 24 hours, last week, last month) |
| Filter Selection | When you filter the selection, only the chosen item will be displayed in the chart and two buttons will appear: Edit: Opens the form to modify the selected item Show: Displays a preview of the item |
| Legend | Shows the name and corresponding color of each item in the chart |
| Chart | Displays the number of times each item was watched |
| Download | Choose your desired statistics and opt for detailed statistics if needed. To download, click the Download CSV button. |

4.1.2 Customer Metrics

The Customer Metrics area presents data on the quantity of elements created across all entities.

4.2 Settings

Under Settings, you can adjust global settings that will apply to all pages within this customer's account.

Note that modifying these settings can have a significant impact on the overall appearance and functionality of the customer's website.

4.2.1 General

| | |
|---------------|--|
| Name | The customer's full name |
| Address | The customer's complete address |
| Contact email | The customer's primary contact email address |

4.2.2 Site

| | |
|----------------|--|
| Domain name | This is the unique address that users will type in their web browser to access your website. For example, example.com |
| Frontend URL | This is the complete web address of your website's homepage. For example, https://example.com |
| Site name | The title that will appear in browser tabs and search results. |
| Site image | This image will be displayed when your website URL is shared on social media platforms. Note: If an article has a header image, it will be used as the social share image. |
| QR-Code Brand | Personalize your QR Codes by selecting a central icon. For a polished look, we recommend uploading PNG files with transparent backgrounds, allowing for seamless integration of your chosen icon. |
| Error pages | Page Not Found (404): Select the article to show when a visitor requests a page that doesn't exist (incorrect URL) |
| Cookie consent | After you've activated the cookie consent feature, you'll be presented with fields where you can enter the specific labels that will be displayed to your website visitors. These labels are crucial for: Transparency: Clearly informing visitors about the types of cookies used on your site (e.g., "Essential Cookies", "Functional Cookies", "Marketing Cookies") User Control: Allowing visitors to easily understand and control which cookies they consent to Compliance: Ensuring your website complies with relevant data privacy regulations (such as GDPR and CCPA) |

4.2.3 Article types

This section allows you to manage the different types of articles that can be created on your webpage.

While you can create various article types, the most frequent are typically:

Blogs: For publishing articles, and news

Pages: For creating static content such as “About Us”, “Contact”, or “Terms of Service”

Shop products: Organize the items you sell in your e-shop

Donation: Organize your donation links

| Article types | | |  |
|---------------|------|--------------|--|
| blog | Blog | article-blog |   |
| page | Page | article-page |   |

To add more article types, simply click the **Add** button.

Enter the name of the new article type. Only lowercase letters, numbers, and underscores are allowed in the article type name (“[a-z0-9_”]).

Once you enter the name, the system will automatically generate default labels and a tag name for the new article type. You can customize these defaults to your liking.

Finally, click the **Create** button to save the new article type.

After the changes are saved, the newly created article type will become available for selection in the **Article** area of the sidebar, allowing you to create content within this new category.

4.2.3.1 *Edit Article type*

After creating an article type, you can edit the new entry.

4.2.3.2 *Overview (Blog and Shop only)*

Route to the overview

Choose the destination for your blog or shop overview.

Ensure you've added a sitemap item first 4.4

Display options for overview

Configure how the overview of this article type will be displayed.

| | |
|-----------------------------|--|
| Show Tag-Cloud (blogs only) | If enabled, a tag cloud will be displayed alongside the newest articles, allowing users to filter content by tag |
| Number of Columns | Defines the number of columns used to display the articles |
| Show Title | If enabled, the title of each item will be displayed |
| Show Content | If enabled, a portion of the article content will be displayed |
| Show Date | If enabled, the publication date will be displayed for each item |
| Show Author | If enabled, the author's name will be displayed for each item |
| Show Button | If enabled, a "Read More" button will be displayed for each item on the overview page, linking to the full article |

4.2.3.3 *Template*

Templates provide a flexible way to structure the content of your articles.

For each article type, you can use a template to define the order in which article-related elements are displayed to visitors.

To edit a template, navigate to the article type and click **Edit**.

Select items from the dropdown to add them to the template, and easily reorder them by dragging and dropping.

Some template items have settings that allow you to customize their style and behavior. Click the edit button to modify these settings.

| Template | | - Select the template item to add - ▼ |
|--|--|---|
| ▼ | Title | Edit Delete |
| ▼ | Content | Edit Delete |
| Title | Renders the title of the article. This can be customized on individual pages through page settings 7.11 | |
| Header Image | Renders the header image of the article. This can be customized on individual pages through page settings 7.11 | |
| Content | Presents the main body of the article. | |
| Linked Cms Items | Displays articles and media files linked to this article. | |
| Record | Embeds and displays another article within the current page. Ideal for reusable content sections, like blog footers | |
| Byline | Shows the byline including creation datetime, category and author | |
| Keywords | Lists the keywords associated with the article | |
| Breadcrumb | Shows the navigation path to the article's category, if applicable | |
| Meta Data | This displays specific metadata for an article. For example, if you're viewing a shop article, it will show its price and available variants. Learn more about article metadata here 7.4 | |

4.2.3.4 *Labels*

Configure message-boxes and buttons for this article type:

| | |
|------------------|---|
| No-Items message | Message to display when no articles are found |
| Read-more button | Sets the label and icons for the Read-more button |
| Load-more button | Sets the label and icons for the Load-more button |

4.2.4 Language

This translation feature utilizes Google Translate. You can customize its behaviour here.

| | |
|-----------------------------------|--|
| Default Content Language | Enter the two-letter language code of the language your webpage was originally written in (e.g., en for English) |
| Allowed languages for translation | Enter the two-letter language codes for the languages you want to make available to your audience, separated by commas (e.g., en,de,fr for English, German and French). These languages will be presented in a dropdown menu. |
| Skip translation labels | Enter any specific text or labels that should be excluded from the automatic translation process. This can be helpful for maintaining the original language for certain elements (e.g., brand names, technical terms). |
| Default Display Format | Specify the locale to control the formatting of dates, numbers, and currency on your webpage. |
| Display Format preview | A preview of the selected display format will appear here |

4.2.5 External

4.2.5.1 Search Settings

| | |
|----------------------|--|
| Search Provider | Chose the search providers. If the provider supports testing, a Test button will appear. |
| Google Custom Search | <p>Engine-ID: The unique identifier for your Google Custom Search engine. Find it in your control panel: https://programmablesearchengine.google.com/controlpanel/all</p> <p>API Key: Your API key for Google Custom Search API access. Obtain it from the Google Cloud Console: https://developers.google.com/custom-search/v1/introduction</p> <p>Search page route: Enter the URL path for your search results page (e.g., /customer/search).</p> |
| External Search | <p>Search Page: Chose from the list of search-engines</p> <p>Additional Search Terms: Add default search terms that will be automatically added to every user's search query (e.g., "site:example.com", "file:pdf" etc.)</p> |

4.2.5.2 Payment providers

Here, you can manage your external payment providers.

Click **Add** to create a new provider, or **Edit** to modify an existing.

Stripe

Create a Restricted API Key:

1. Login to **Stripe**
2. Go to **Developers** (bottom left corner) > **API keys**
3. Click **Create restricted key**
4. Select **Providing this key to another website**
5. Enter a **Name** for the new key
6. Set all access to **None** then activate:
 1. **Checkout** → **Write**
 2. **Orders** → **Read**
7. Copy the generated API token and paste it into the API-Key field of your AveStream payment provider settings.

Add the AveStream Webhook:

1. Go to **Developers** (bottom left corner) > **Webhooks**
2. Click **Create an event destination**
3. Paste the **Web-Hook URL** from AveStream into the **Endpoint URL** field
4. Click **Select events** and chose:
 - checkout.session.completed
 - payment_intent.created
 - payment_intent.succeeded
 - charge.succeeded
 - charge.updated
5. Click **Add endpoint**

4.2.5.3 **Google Tag Manager**

| | |
|----------------|--|
| Tag Manager ID | Enter the Google Tag Manager ID to include Google-Tag-Manager https://support.google.com/tagmanager/answer/14842164 |
|----------------|--|

4.2.5.4 **YouTube Data API**

| | |
|---------|---|
| API Key | Enter your YouTube Data API key to enable automatic parsing of YouTube videos |
|---------|---|

Create a Google Account and Activate the YouTube Data API:

Follow the instructions at:

<https://developers.google.com/youtube/v3/getting-started>

Note: You can skip any steps related to authorization credentials (OAuth2) as this isn't currently implemented.

Generate the API Key:

- Once on the **YouTube Data API v3** details page, go to the **Credentials** tab
- Click **Create credentials** and select **API key**
- Copy the generated API key and paste it into the designated field within AveStream

Restrict Your API Key (Recommended):

Restricting your API key enhances security by limiting where it can be used

1. Find your newly created API key and click the Actions button (often represented by three dots or a pencil icon) to edit it
2. Under **Application restrictions**, choose **Websites**.
3. Add two Website-restrictions by clicking the **Add** Button
 - *.avestream.com/*
 - avestream.com/*

Important:

Please include a Data Protection information section on your webpage if you utilize any external analytics tools, to ensure compliance with GDPR.

4.2.6 Newsletter

Under the Newsletter section, you can configure a newsletter provider for the selected customer.

Choose the newsletter provider you wish to use (e.g., Mailchimp, SmartEmailing, etc.). Some providers may require a username, while others may only require an API key.

Enter the required credentials (username and/or API key) for the selected provider. Once you've entered the credentials, a **Test Settings** button will appear.

Newsletter Provider
MailChimp

API-Key
.....

Groups

Test API

Upon successful Test, AveStream will automatically retrieve a list of available newsletter lists from your provider's account.

API-Key
.....

Groups

Display name: Weekly news
Newsletter-List: [redacted]
is active

Enter a user-friendly display name for the newsletter group (e.g., "Main Newsletter").

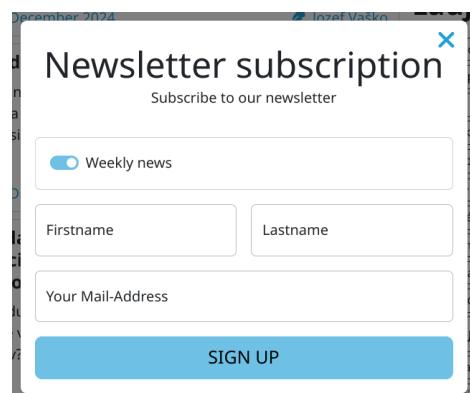

Select the desired newsletter list from the dropdown menu.

Activate the newsletter group to enable newsletter subscriptions for your website users.

If you're using **Mailchimp**, you can add tags to be automatically applied to new subscribers.

After successful configuration, a newsletter subscription box will automatically appear after the first page navigation on your website.

You can also optionally add the subscription box to your social media links (see the Social Media section for more details here 4.2.7).

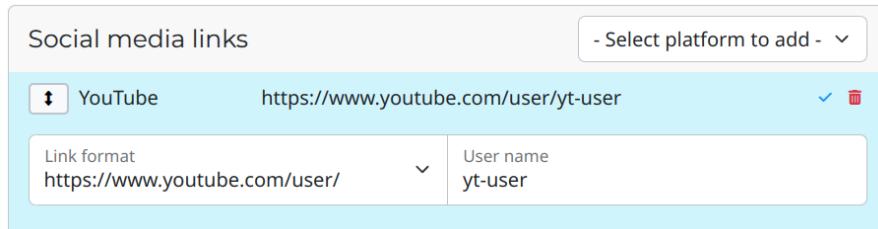

4.2.7 Social Media

Add as many social media links as needed (we recommend a maximum of five).

To add a new link, select the desired platform from the dropdown menu.

Edit existing links by clicking the edit button.

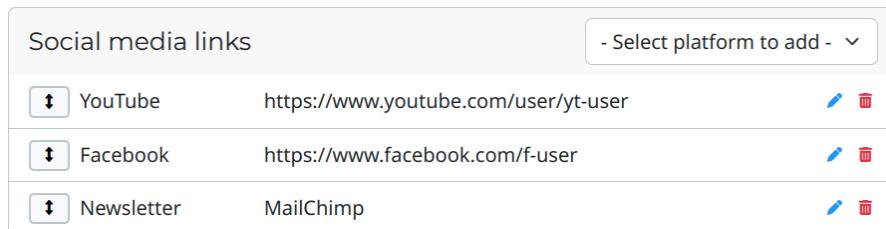

The screenshot shows a configuration interface for adding social media links. At the top, there is a label 'Social media links' and a dropdown menu labeled '- Select platform to add -'. Below this, there is a list of links. The first link is for YouTube, with the URL 'https://www.youtube.com/user/yt-user'. To the right of the URL are two icons: a blue edit icon and a red delete icon. Below the URL, there is a 'Link format' dropdown set to 'https://www.youtube.com/user/' and a 'User name' input field containing 'yt-user'. The entire interface is set against a light blue background.

Select your preferred link template (some platforms like **YouTube** offer multiple options). Enter the **username** of the platform you'd like to add.

You can arrange links in any order by dragging and dropping them.

If you've set up a newsletter, you can add a subscription box as a social media link by selecting **Newsletter** from the dropdown. No further information is needed for this item.

(See 4.2.6 for instructions.)

The screenshot shows a configuration interface for adding social media links. At the top, there is a label 'Social media links' and a dropdown menu labeled '- Select platform to add -'. Below this, there is a list of links. The first link is for YouTube, with the URL 'https://www.youtube.com/user/yt-user'. The second link is for Facebook, with the URL 'https://www.facebook.com/f-user'. The third link is for Newsletter, with the URL 'MailChimp'. To the right of each URL are two icons: a blue edit icon and a red delete icon. The entire interface is set against a light blue background.

Configured social media links will be displayed in the footer of every page.

4.2.8 E-Mail

Configure the styling of emails sent by AveStream.

| | |
|-----------------|---|
| Font size | Header: Defines the font size of the header text in the email Body: Defines the font size of the main body text in the email Footer: Defines the font size of the footer text in the email |
| Mail width | Defines the width of the email content area (in pixels) |
| Border radius | Defines the border radius of the email container (in pixels) |
| Mail Background | Sets the background color of the entire email |
| Primary | Sets the primary color used for the Header background |
| Primary Text | Sets the primary foreground color for text elements (contrast to Primary color) |
| Body Background | Sets the background color of the email body |
| Body text | Sets the color of the main body text in the email |
| Footer text | Sets the color of the footer text in the email |

Specific Mail Settings

You can customize the configuration for each mail type:

| | |
|--------------------|---|
| Enabled | Determines if this mail type is active. Note that some mail types are mandatory and cannot be deactivated |
| Subject | Sets the subject line of the email |
| Heading | Sets the main heading within the email body |
| Additional Content | Defines an additional text block to append to the email content |

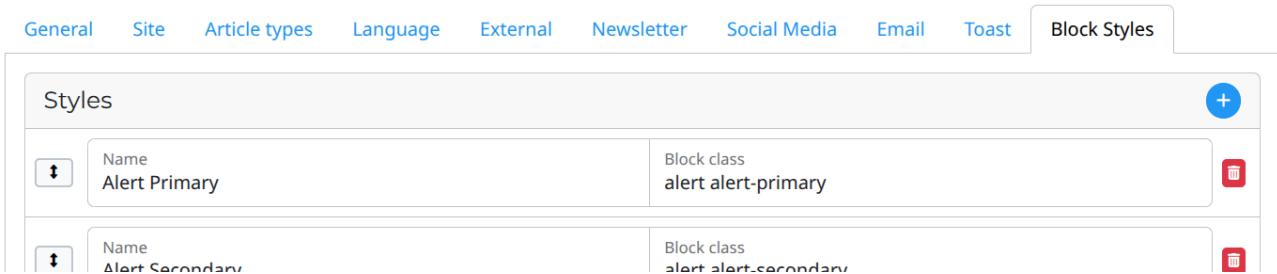

4.2.9 Toast

Customize how your toast messages look and behave. Toasts are small, temporary notifications that appear on the screen and then disappear automatically.

| | |
|----------------------|--|
| Additional CSS class | Add custom CSS classes to your toasts (e.g., p-3 for padding) |
| Max. messages | Define the maximum number of toasts visible simultaneously |
| Placement | Choose where toasts appear on the page |

4.2.10 Block Styles

The Block Styles tab allows you to define custom styles for use within the **Block** content element (See 7.13.7) and the **Full Editor** content element (See 7.13.28)

The screenshot shows the 'Block Styles' tab selected in a navigation bar. Below it is a table titled 'Styles' with two entries:

| Name | Block class |
|-----------------|-----------------------|
| Alert Primary | alert alert-primary |
| Alert Secondary | alert alert-secondary |

Each row has a blue 'Edit' icon and a red 'Delete' icon. A blue '+' icon is located in the top right corner of the table header.

Click the **Add** button to create a new style.

Change the order: Use drag-and-drop to easily rearrange the order of styles.

Click the **Delete** button and confirm in the dialogue box.

Important: You can only define CSS classes. Ensure the style is defined in your Editor CSS (See 4.5.2)

4.3 Shop Settings

You can configure your shop's settings in the Shop Settings section. This section is visible only after you activate the **Shop article type 4.2.3**

4.3.1 General

| | |
|-----------------|--|
| Currency | Choose the currency in which your shop's products are priced and transactions are processed. |
| Order recipient | Please provide the email address to which order confirmations and updates should be sent. For detailed email configuration, see Section 4.2.8 |

4.3.2 Product

| | |
|-------------------|--|
| Price label | Define the text that will appear above or next to the product price on your shop pages |
| Price hint | Define additional descriptive text that appears near the price to provide extra information or context |
| Placeholder image | Select an image from your media library to be displayed for products that do not have a specific image assigned to them. |

4.3.3 Inventory

| | |
|-------------------------|---|
| Enable stock management | If this is enabled, you'll activate stock tracking for your products |
| Low stock threshold | This sets the minimum inventory level at which a product is flagged as having low stock. |
| Out of stock threshold | This determines the inventory level at which a product is considered to be out of stock. |
| Stock display format | <p>This defines how product stock levels are presented to your customers.</p> <p>Show No Quantity: Displays a generic "In Stock" message without revealing the exact number of items.</p> <p>Show Quantity Remaining: Shows the precise number of items left in stock (e.g., "15 left in stock").</p> <p>Show Quantity Remaining If Low: Only displays the exact quantity remaining when the stock level falls below the low stock threshold (e.g., "Only 5 left!").</p> |

4.3.4 Shipping

Shipping zones

Manage your shipping zones and their associated costs here. You can create multiple zones to cover different regions.

| | |
|-----------|--|
| Is active | Check this box to enable or disable this shipping zone |
| Title | Set a descriptive name for your shipping zone (e.g., "Domestic," "EU Standard," "International") |
| Regions | Select the countries where this shipping zone is available |
| Cost | Define the shipping cost for this specific zone |

4.3.5 Buttons

| | |
|----------------------|---|
| Add-To-Cart button | Defines the visual elements of the button users click to add products to their shopping cart |
| Open-Checkout button | Define the visual elements and functionality of the button that takes users directly to the checkout page from the cart or product page |
| Pay-Now button | Defines the visual elements and functionality of the button that initiates the payment process and completes a purchase |

4.3.6 Labels

| | |
|-----------------------------|---|
| Basket-Total label | Defines how the total cost of items in the shopping cart is displayed to the user |
| Empty-shopping-cart message | Define the text that is displayed to users when their shopping cart is empty |
| Add-to-cart toast | Specify the confirmation message that appears when a visitor successfully adds an item to their shopping cart. For additional toast configuration, see Section 4.2.9 |

4.3.7 Page setup

In the Page Setup section, you can define the links to your shop-specific pages. To select these links, you must first add the corresponding menu-items in the Sitemap section 4.4

| | |
|----------------------|--|
| Cart page | Select the route that serves as the user's shopping cart |
| Checkout page | Select the route where users finalize their purchase details and payment |
| Terms and conditions | Select the route containing your shop's legal terms and conditions |
| Payment success | This is the path users are redirected to after a successful payment |
| Payment cancel | This is the path users are redirected to if their payment was cancelled |

4.4 Sitemap

Under the Sitemap section, you can customize the sitemap of your webpage.

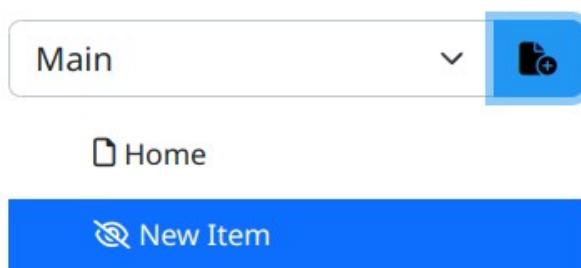

4.4.1 Choose sitemap

Select the desired navigation from the drop-down menu to manage it.

4.4.2 Add new menu-item

To add a menu item, click **Add**. It appears after the selection, or at the end if nothing was selected.

4.4.3 Change the order / hierarchy

You can rearrange items by dragging and dropping them. To create a hierarchical structure, drop an item onto another menu item.

4.4.4 Edit a menu-item

When you select a menu item in the tree structure, its settings will be displayed on the right side. Here's a breakdown of each setting:

| | |
|------------------------------------|---|
| Type | <p>Choose the type of menu item:</p> <p>Static: Links to an existing static page (if available)</p> <p>Dynamic: Links to the specified article</p> <p>External: Links to a custom URL (internal or external)</p> <p>Folder: Creates a folder to organize other menu items (not visible in the frontend)</p> <p>Article tag: Will show a list of articles based on the tag-filter used.</p> |
| Label | Label will be shown in menu |
| Icon class (Optional) | <p>Define an icon for the menu item using Font Awesome classes (e.g., fa-solid fa-house).</p> <p>Find available icons here: https://fontawesome.com/icons</p> |
| Route | Defines the URL that appears in the browser address bar when this menu item is selected. |
| Dynamic page (Dynamic Type Only) | The ID of the article to be linked for dynamic menu items |
| External Link (External Type Only) | Enter the web address (URL) to which this menu item will link |
| Match | <p>Determines when the menu item is highlighted as active:</p> <p>Starts with: Active when the URL starts with the defined route</p> <p>Exact match: Only active when the URL exactly matches the defined route</p> |
| Is visible | Controls whether the menu item is displayed in the frontend |

4.4.5 Show

Click the **Show** button to preview the page associated with the selected menu item in the frontend.

4.4.6 Delete a menu-item

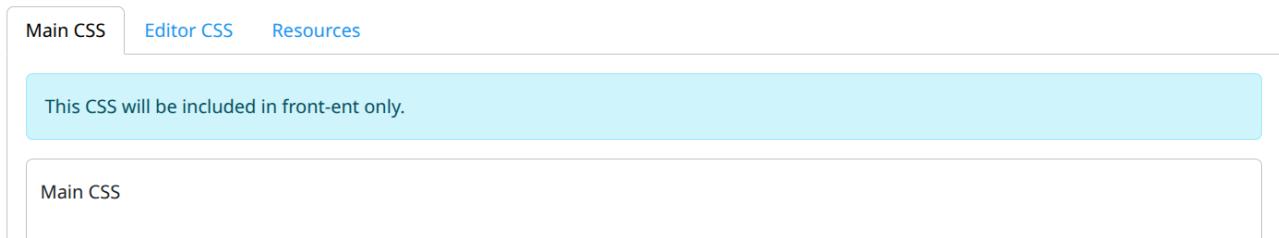

To delete a menu item, select it in the tree and then click the **Delete** button. Confirm the deletion in the dialogue box to permanently remove the item.

4.5 Style & Resources

Use the Style Page to add custom style definitions to your page.

4.5.1 Main CSS

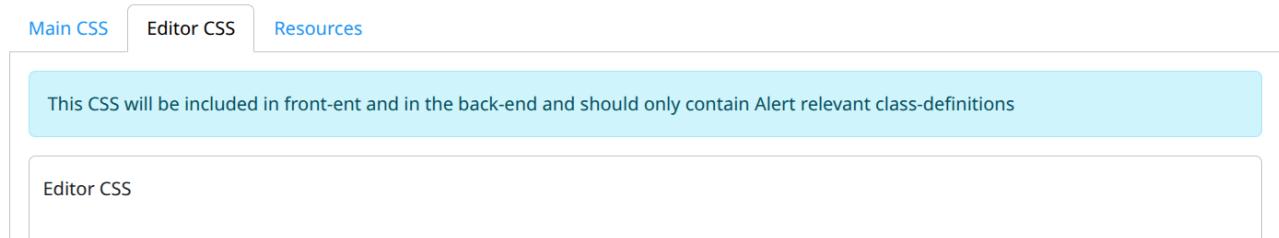

The main CSS file is loaded after all other CSS files, giving you the ability to override any system-defined styles.

The screenshot shows a user interface for managing styles. At the top, there are three tabs: 'Main CSS' (which is selected and highlighted in blue), 'Editor CSS', and 'Resources'. Below the tabs is a light blue horizontal bar containing the text 'This CSS will be included in front-ent only.' Underneath this bar is a white area labeled 'Main CSS'.

4.5.2 Editor CSS

The Editor CSS file is loaded in both the frontend and backend and should be scoped to only style elements within the **.as-article-content** container.

The screenshot shows a user interface for managing styles. At the top, there are three tabs: 'Main CSS', 'Editor CSS' (which is selected and highlighted in blue), and 'Resources'. Below the tabs is a light blue horizontal bar containing the text 'This CSS will be included in front-ent and in the back-end and should only contain Alert relevant class-definitions'. Underneath this bar is a white area labeled 'Editor CSS'.

4.5.3 Resources

The Resources tab allows you to include external JavaScript and CSS files.

You can also define custom meta tags and link tags. This is where you can specify your website's favicon and other page-specific metadata.

We recommend using a favicon generator to get all needed files from a single png or svg realfavicongenerator.net

In the process, you will be asked about the "Favicon path". please use something like "/avestream/favicon/"

Unpack the zip file and upload all files into the subfolder you entered prior in the "Favicon path"

Paste the "<head>" in the "Include in Head" by clicking the "Import from HTML" Button.

Include in Head

- Add new item - `</>`

| | | | |
|------|---|---|--|
| Link | /assets/customers/avestream/favicon-96x96.png | rel="icon" type="image/png" sizes="96x96" | |
| Link | /assets/customers/avestream/favicon.svg | rel="icon" type="image/svg+xml" | |

Head

Resources added here will be inserted at the end of the <head> section of your webpage. Supports JavaScript (<script>), CSS (<link>), meta tags (<meta>), and link tags (<link>).

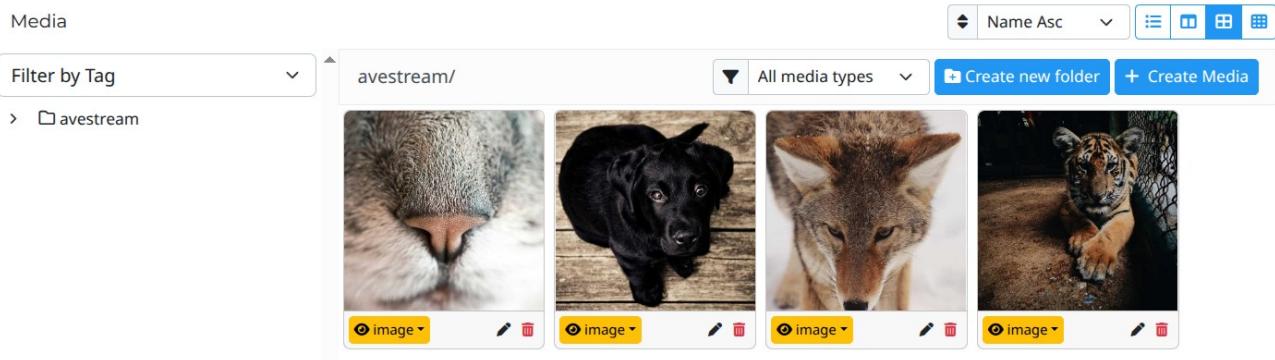

Body

Resources added here will be inserted at the end of the <body> section of your webpage. Only JavaScript (<script>) resources are allowed.

| | |
|---------------|---|
| Add new item | Use the dropdown menu to add individual resources to the selected group |
| Add from HTML | Click Add from HTML to open a modal window where you can paste HTML code. Clicking Add will parse the HTML, extract resource links, and add them to the selected group. |

5 Media

The Media Section allows you to manage your web files, such as images, PDFs, videos.

The left sidebar of the File Manager provides two key navigation and filtering tools:

- Selecting **Category** or **Keyword** in the dropdown displays tagged files on the right
- Clicking a folder in the tree shows its contents on the right

5.1 Toolbar

| | |
|--|--|
| | Choose how to order the files in your list (e.g., by name, date) |
| | Change the view mode List: Displays folder contents as a simple list of file and folder names Grid: Displays a preview of each file when available, alongside its name. You can choose from three different preview sizes. |
| | Refine your file list by selecting a specific file type from the dropdown menu. |
| | Add a new folder within your current directory. |
| | Refer to 5.3 for detailed information on creating new media. |

5.2 Preview

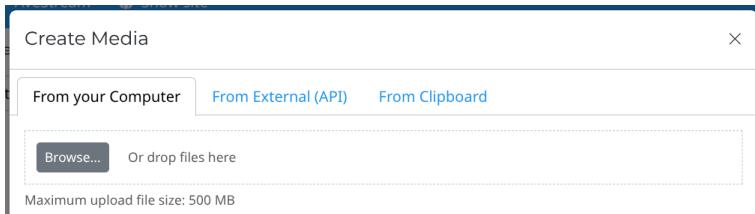

| | |
|--|--|
| | The Preview feature allows you to view a selected file in a separate tab. If multiple variants of a file are available (e.g., different sizes of an image), a dropdown menu will appear. Use this dropdown to select the specific size you wish to preview. |
|--|--|

5.3 Create Media

Upload / Create new media with the help of this dialog.

5.3.1 Upload from your Computer

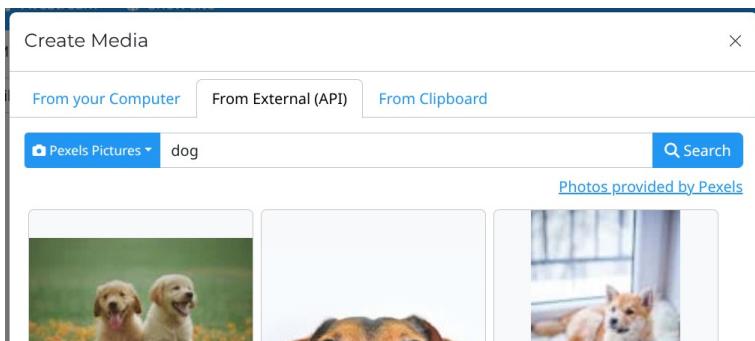

This feature allows you to upload files directly from your computer.

For convenient uploading, drag-and-drop your files into the designated area.

5.3.2 Import from External (API)

The External section of the Media Manager enables you to directly download images, videos, and GIFs from integrated third-party providers like Pexels or Giphy.

Select the provider and file type by using the dropdown.

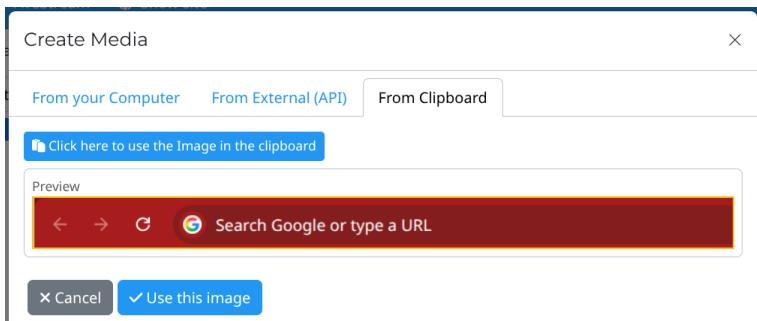

Search pictures at Pexels

Enter your search terms in the search field and click the **Search** button to view the first page of results.

Click the Download button to import the selected file. To import a different size, use the dropdown menu next to the Download button.

At the bottom of the result list, click the Load More button to load the next page of search results.

5.3.3 Create from Clipboard

AveStream lets you directly paste images from your clipboard, making it easy to add visuals. You can paste screenshots, images copied from applications like Word, or even Excel cell ranges as images.

To use an image from your clipboard:

1. Click the Paste from Clipboard button
2. If an image is detected in your clipboard, it will appear in the preview area
3. Click the Use this image button to upload it to your currently selected folder

The new image will be automatically named in the format "screenshot_date_time.ext"

Note: For this feature to work, ensure you've granted AveStream the necessary permissions to access your clipboard.

5.4 Edit Media

Opens a form to modify the metadata of a file.

| | |
|-----------------------|---|
| Alternative Text | Sets the alternative text for image files |
| Title | Sets the title of a file |
| Caption | Sets the caption of a file |
| Categories / Keywords | Defines categories and keywords for a file, enabling selection files by tags in content elements Audio 7.13.5, Images 7.13.3, and Downloads 7.13.6 |

5.5 Delete Media

To delete a media, click the Delete button. A confirmation dialogue will appear. Click Confirm to permanently remove the media.

6 Video-Items

In the Video section, you can create video entries tailored to various needs.

6.1 Streams

In the Streams section, you can manage your live streams.

| Streams | | | | Actions | Title | Category | Widget | 🕒 | 🕒 | 🕒 | 🕒 | 🕒 | 🕒 | 🕒 | Next Parse | Last Parsed | Created |
|---------|--|-----|----------------------------------|---------|-------|----------|--------|---|---|--------|----------------|---------------|---|---|------------|-------------|---------|
| | | ... | The Best Of Norway's Railway SUM | | | | | | 0 | 15 min | 16 seconds ago | 8:19 AM today | | | | | |

The list displays key information such as title, category, availability, and parse status.

Actions:

| | | | | | | |
|------|-------|-------|-------|-----|----------------|-------|
| Edit | 6.1.1 | Parse | 6.1.2 | ... | Show | 6.1.3 |
| | | | | | QR-Code | 6.1.4 |
| | | | | | Create copy | 6.1.5 |
| | | | | | Create program | 6.1.6 |
| | | | | | Delete | 6.1.7 |

6.1.1 Add/Edit stream

To edit an item, click the **Edit** button within the list.

To create a new item, click the **Add** button.

Edit stream

Arrive

General

| | |
|---------------|--|
| Unparsed URL | Enter the original URL from the streaming platform |
| Fallback URLs | Enter up to 5 alternative video URLs to provide a backup options for the same video. |
| Is active | When enabled, the item will be active and visible on the frontend |
| Widget | Add a web widget for interactive elements (optional) |
| Language | Define the language of the streamed content |

Override

| | |
|-------------|--|
| Title | Replace the original video title with a custom title |
| Description | Replace the original video description with a custom description |
| Thumbnail | Replace the original video thumbnail with a custom image |

Tags

| | |
|------------|--|
| Categories | Add categories for this video to organize your library |
| Keywords | Add relevant keywords to this video to facilitate grouping and searching |

System

| | |
|-------------------|---|
| Parsing frequency | Determines how often the system checks for updates to this item |
| Sort | Defines the order in which the stream will be displayed |

Statistics

Review statistics for this item. Select a specific time period to analyse trends and data.

Force visibility

The Force visibility action allows content managers to manually override the automatic status of a Stream-Element's **Is Live** and **Is Available** properties, and temporarily halt the automated status updates from the parser.

This feature is useful for troubleshooting, pre-launch setup, or manual control during critical events.

To access the feature, locate and click the **More actions** menu and select the **Force visibility** option from the dropdown menu.

A pop-up window titled **Force visibility** will appear, containing three main controls:

| | |
|------------------|--|
| Is Live | Manually sets the status of whether the stream is currently live. |
| Is Available | Manually sets the status of whether the stream is currently playable/viewable. |
| Parser-Frequency | Sets the time interval (in minutes) for the parser to ignore this item. Setting a value here stops the periodic parser check for the specified duration. |

Click **Update** to apply the forced settings to the item

You must click **Save** on the main editing page to finalize and persist these changes.

Important!

The time set in the Parser-Frequency field expires, allowing the parser to resume its normal checks and potentially overwrite your status.

6.1.2 Parse stream

Triggers an immediate update of the selected item. Use this after making any changes to the item's settings. **Note:** If the Unparsed URL contains a YouTube video, a valid YouTube Data API key must be provided in the settings 4.2.5

6.1.3 Show stream

Click the **Show** button to open a preview of the stream in a new browser tab.

6.1.4 QR-Code

Click to generate a QR code linking to this item. If a brand image is set in your settings 4.2, it will appear in the centre.

6.1.5 Create copy

To create a new item based on existing settings, use the **Create copy** button. This will create a duplicate of the current item. Edit the copied data as desired and save the item.

6.1.6 Create program

To create a program based on the settings click the **Create program** button. A new program item will be created, pre-filled with data from the current stream. (Program 6.2)

6.1.7 Delete stream

To delete a stream, click the **Delete** button. A confirmation dialogue will appear. Click **Confirm** to permanently remove the stream.

6.2 Program

Manage your program items here.

| Programs | | | | | | | | 1 / 1 | Reload | + Add | |
|----------|---------------------------------------|----------|-------|--------|---------------|-------------|---------------|---------------|--------|-------|--|
| Actions | Title | Category | Start | Series | Next Parse | Last Parsed | Created | | | | |
| ... | The Best Of Norway's Railway S trains | ✓ | ✓ | | 9:23 AM today | 15 min | 0 seconds ago | 9:23 AM today | | | |

The list displays key information such as title, category, availability, and parse status.

Actions:

| | | | | | | |
|------|-------|-------|-------|-----|-----------------|-------|
| Edit | 6.2.1 | Parse | 6.2.2 | ... | Show | 6.2.3 |

6.2.6 Create copy

Create a copy to quickly start a new item with similar settings. Modify the copied data and save the new item.

6.2.7 Create archive

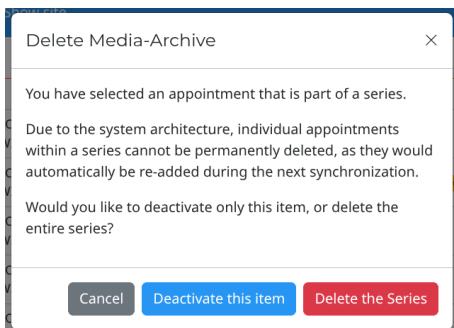

Create an archive based on the settings of this program

6.2.8 Delete program

To delete an item, click the **Delete** button.

Confirm the deletion in the dialogue box to permanently remove the item.

Note: Due to the system architecture, individual appointments within a series cannot be permanently deleted, as they would automatically be re-added during the next synchronization. That's why single entries can not be deleted only deactivated.

6.2.9 Repeat

Configure this program to run regularly by setting the desired interval. This allows you to automate the program's execution, ensuring consistent operation without manual intervention.

Repeat

| | | | |
|---------------|----------|---|---|
| Interval type | Day | Interval | 1 |
| Color | End date | ■ 11/2/2025 [x] | |

| | |
|---------------|--|
| Interval type | Choose the unit of time for the interval (e.g., Hour , Day , Week) |
| Interval | Specify the numerical value for the interval. For example, setting this to 2 with a Day interval type will cause the program to repeat every two days. |
| Color | Assign a color to this series for visual distinction in the program list |
| End date | Changes to the form will automatically refresh the preview below, showing the effect of your settings. The original item will be indicated with a blue bar, and the copies will have yellow bars next to it. |

The series will be visible in the program list once you save your settings.

| Programs | | | | | | | | | | ▼ Load more | 9 / 9+ | ↻ Reload | + Add |

Statistics

Review statistics for this item. Select a specific time period to analyse trends and data.

6.3.2 Parse archive

Triggers an immediate update of the selected item. Use this after making any changes to the item's settings. **Note:** If the Unparsed URL contains a YouTube video, a valid YouTube Data API key must be provided in the settings 4.2.5

6.3.3 Show archive

Click this button to open a preview of the stream in a new browser tab.

6.3.4 QR-Code

Click to generate a QR code linking to this item. If a brand image is set in your settings 4.2, it will appear in the centre.

6.3.5 Create copy

Quickly create a new item based on the current one.

Modify the copied data as needed and save the new item.

6.3.6 Delete archive

To delete an item, click the **Delete** button.

Confirm the deletion in the dialogue box to permanently remove the item.

6.4 Sequences

Before watching an archived video on the mobile platform, viewers will encounter a short sequence. This presents an ideal opportunity to:

Solicit donations to support your continued work

Highlight important news and updates related to your organization

| Sequences | | | |
|-----------|------|-------------------|---|
| Actions | Name | ActionLinkCaption | ActionLinkUrl |
| | | | Created |
| | News | Read more | https://www.avestream.com/ |
| | | | 13:03 today |

In the list, you'll see essential details like title, category, availability, and parse status.

Actions:

| | | | |
|------------|----------------|-------------|-------|
| Edit 6.4.1 | Download 6.4.2 | Create copy | 6.4.3 |
| | | Delete | 6.4.4 |

6.4.1 Add/Edit sequence

Edit an existing item by clicking the **Edit** button within the list.

To create a new item, click the **Add** button.

| Button URL | Enter the URL that will be opened when the button is clicked |

6.4.2 Download sequence

To download the video for this article, click the **Download** button. If your browser can play the video, it will be displayed in a new tab.

6.4.3 Create copy

This will open a new item pre-filled with the data from the original. Modify the values as needed and save the new item.

6.4.4 Delete sequence

After confirming in the dialogue box, the item will be permanently removed.

7 Articles

An article is a piece of written content. On a website, articles can be presented as web pages. Two common types of articles found on websites are blog posts and static pages.

| Pages | | Actions | Title | Created | Updated | Published | SEO | Search | 1 / 1 | Reload | + Add |
|-------|--|---------|-------|-------------|-------------|-----------|-----|--------|-------|--------|-------|
| | | ... | Home | 13:37 today | 13:38 today | | | | | | |

Actions:

| | | | |
|----------|-------------|-----|-----------------|
| Edit 7.3 | Preview 7.5 | ... | QR-Code 7.6 |
| | | | Export 7.7 |
| | | | Create copy 7.8 |
| | | | Delete 7.9 |

7.1 Search

If you have many articles, you can easily find a specific one by opening the search dialogue. Click here to learn more about using the search dialogue 9.3

7.2 Types

To create additional types, view customer settings 4.2.3

| | |
|--|-----------|
| | Sequences |
| | Blogs |
| | Pages |

7.3 Edit article

To edit an item, click the **Edit** button in the list.

To create a new item, click the **Add** button.

| | |
|------------------|---|
| Title | Enter the title of this article |
| Header image | Select the image to use as the header image (See File Manager 9.4) |
| Article contents | Manage contents for this article. The 'Fill View' indicates how full the high-performance page is. Reaching 100% will still allow saving, but may impact performance. |

7.3.1 Tags

Tags (2) ^

Category ▼ + Add

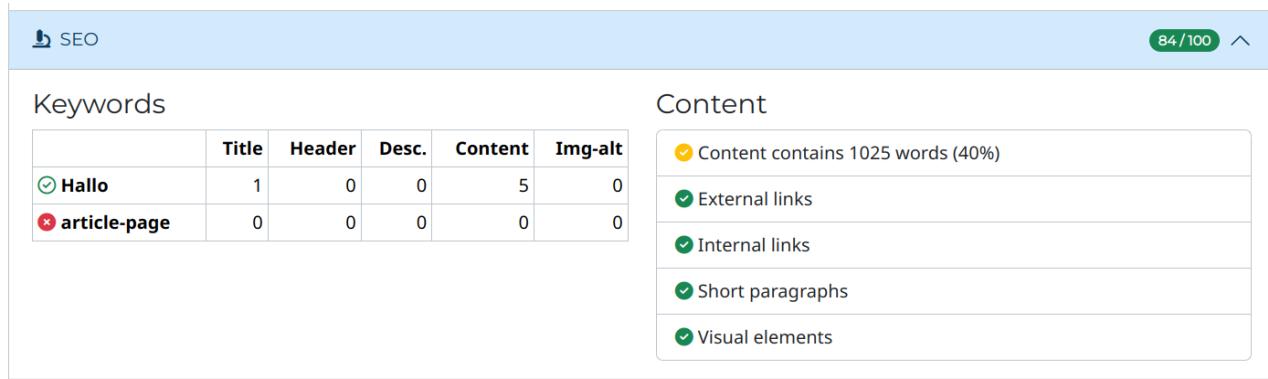

Select category

Keywords + 🌐

article-page × Hallo ×

| | |
|------------|---|
| Categories | Add categories for this article to organize your library |
| Keywords | Add relevant keywords to this article to facilitate grouping and searching. |

7.3.2 SEO

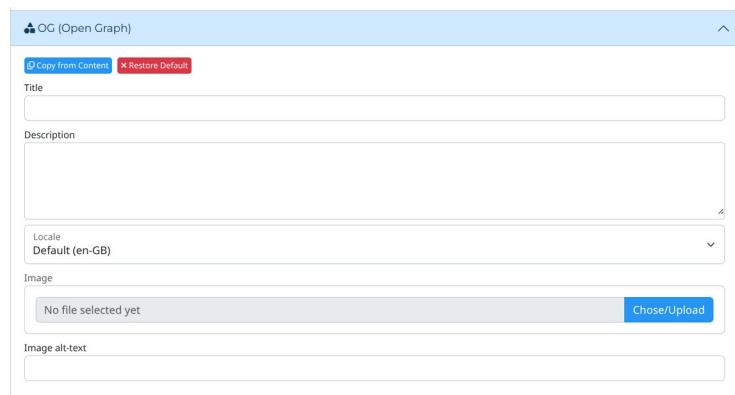

The screenshot shows the SEO section with a blue header bar. The left side displays a table of keywords with columns for Title, Header, Desc., Content, and Img-alt. The right side shows a list of SEO tips with checkmarks: Content contains 1025 words (40%), External links, Internal links, Short paragraphs, and Visual elements. A progress bar at the top right indicates 84/100.

| | Title | Header | Desc. | Content | Img-alt |
|--------------|-------|--------|-------|---------|---------|
| Haloo | 1 | 0 | 0 | 5 | 0 |
| article-page | 0 | 0 | 0 | 0 | 0 |

Under the SEO section, you can view the current SEO Rating for this article. This section provides tips on how to improve your SEO Rating.

7.3.3 OG (Open Graph)

The screenshot shows the OG (Open Graph) configuration form. It includes fields for Title, Description, Locale (Default (en-GB)), Image (with a 'Choose/Upload' button), and Image alt-text.

This feature allows you to customize how your article appears when shared on social media platforms (like Facebook, X/Twitter, and LinkedIn).

Default Behavior

By default, the system automatically generates Open Graph tags for your article using the following fallback content:

- **Title:** The article's main title
- **Description:** The first available text from the article content
- **Locale:** "Default Display Format" from Language Settings 4.2.4
- **Image:** The Header image from the article
- **Image alt-text:** The article's main title

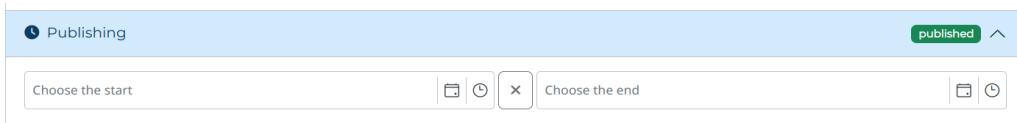

The OG-Tag override form gives you complete control to define custom content for these social media previews.

| | |
|-------------------|--|
| Copy from Content | Copies the default content into the form fields |
| Restore Default | Clears any custom input and restores the system's default behavior |

How to Use the Override Feature

1. **To Quickly Get a Starting Point:** Click the **Copy from Content** button. The fields will populate with the article's default content, saving you time.
2. **To Customize:** Edit the populated OG Title and OG Description fields as desired. (e.g., shorten the description or create a more compelling title for social media).
3. **To Use the Default Content:** If you have entered custom content but decide you want the system to revert to using the article's title/excerpt again, click the "Restore Default" button.

7.3.4 Publishing

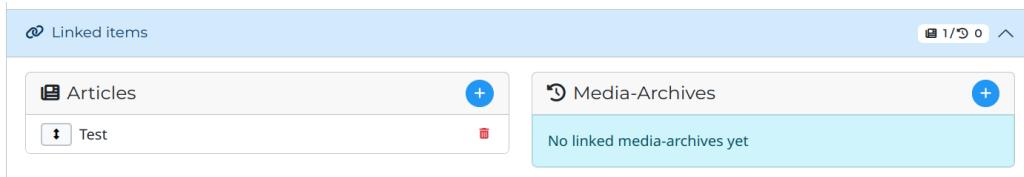

The screenshot shows a publishing interface with a blue header bar. Below it is a search bar with the placeholder 'Choose the start' and a date range selector. To its right is another search bar with the placeholder 'Choose the end' and a date range selector. A green button labeled 'published' is visible in the top right corner.

Control article publication by setting start and end dates

If you only set a start date, the article will be published from that date onwards

If you only set an end date, the article will be published until that date

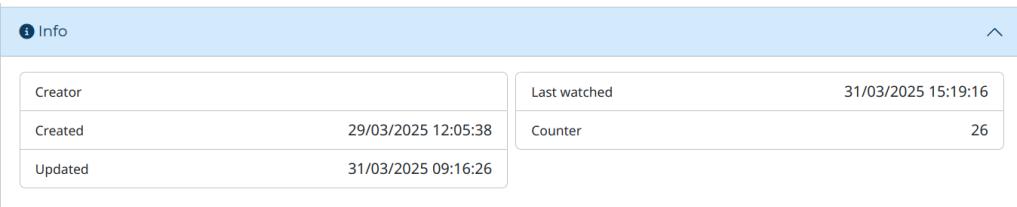

7.3.5 Linked items

The screenshot shows a linked items interface. It features two main sections: 'Articles' and 'Media-Archives'. The 'Articles' section contains a list with one item: 'Test'. The 'Media-Archives' section shows a message: 'No linked media-archives yet'. Both sections have a blue '+' button for adding more items.

You can link to other CMS items (articles and archives) at the end of this article.

7.3.6 Info

The screenshot shows an info section with a blue header bar. Below it is a table with the following data:

| | | | |
|---------|---------------------|--------------|---------------------|
| Creator | | Last watched | 31/03/2025 15:19:16 |
| Created | 29/03/2025 12:05:38 | Counter | 26 |
| Updated | 31/03/2025 09:16:26 | | |

Get additional information about the article.

7.3.7 Statistics

Review statistics for this item. Select a specific time period to analyse trends and data.

7.4 Article Metadata

Some article types include additional metadata fields for you to complete, providing more specific details about the content.

7.4.1 Shop Product

7.4.1.1 General

| | |
|---------------------------|--|
| Product teaser | Add a brief, engaging description of your product here |
| Additional product images | Upload extra images to showcase your product |

7.4.1.2 Price / Variants

| | |
|-------------------------------|--|
| Has variants | Check this box if your product comes in multiple variants (e.g., different sizes, colors) If you check Equal price , you'll only need to enter one price that applies to all your product variants |
| Label (variants only) | This is the name for a specific variant option, such as Red for a color variant or Large for a size variant |
| Price | This defines the price for this specific product or product variant |
| Variant Image (variants only) | Upload an image that represents this particular product variant |
| Stock management | If enabled, you can enter the stock amount and a unique SKU (Stock Keeping Unit) for your product or each variant If stock management is off, you can manually set the Stock status : In Stock : Indicates the product is available for purchase Out of stock : Indicates the product is currently unavailable Out backorder : Indicates the product is out of stock but can still be ordered, with delivery to follow later |

7.4.1.3 Attributes

Add attributes to your shop products. Attributes are presented as a list of Name/Value.

| | |
|-------|---|
| Name | Define the name for the attribute (e.g., "Color," "Size," "Author") |
| Value | Set the corresponding value for the attribute (e.g., "Red," "Large," "Cotton"). |

7.4.1.4 *Options*

Define the options available for your product. Customers can choose one or more of these options when purchasing the product. You can add new options by clicking the Add button. To reorder options, use the drag-and-drop functionality.

Think of this like a pizza configurator: your shop visitors can add various items to their pizza, such as "extra cheese" or "olives".

| | |
|--------------------------|---|
| Label | Set a label for this option group. If defined, this label will appear above the selection buttons |
| Display as | Choose how these options will be presented to customers. Possible display types include buttons or a list |
| Allow multiple selection | Enable this if customers should be able to select more than one choice |
| Name | Enter the name for this specific option (e.g., "extra cheese", "olives") |
| Cost | Set the additional cost associated with choosing this option |

7.4.1.5 *Shipping*

Here, you can define the physical dimensions of this item for shipping purposes.

| | |
|-------------|---|
| Weight (kg) | Enter the weight of the item in kilograms |
| Length (cm) | Enter the length of the item in centimeters |
| Width (cm) | Enter the width of the item in centimeters |
| Height (cm) | Enter the height of the item in centimeters |

7.4.2 *Donation*

Payment link Add the payment link from your payment-provider.

How to create a Payment-Link in Stripe:

- In your Stripe Dashboard, go to the **Payment Links** section.
- Click the **+ New** button.
- Select Products in your Stripe account
- If you haven't created a product yet, click **+ Add new product**
 - Product Details (if new):
 - Name: E.g., "Donation" or "Support Our Mission"
 - Price: For a fixed-amount donation (e.g., €25), set the price here.
 - Click Create link.

Stripe will generate a unique URL that you can immediately start sharing.

7.5 Show article

To view the preview, click the **Show** button. The preview will open in a new browser tab.

Note: Any unsaved changes you've made will be visible in the preview, and an alert will appear on the preview page to indicate this.

7.6 QR-Code

Click to generate a QR code linking to this item. If a brand image is set in your settings 4.2, it will appear in the centre.

7.7 Export article

You can export the Article as a json-backup by clicking the **Export** button.

7.8 Create copy

This will open the Edit-Form with the copy of an existing article.

7.9 Delete article

To delete an article, click the **Delete** button.

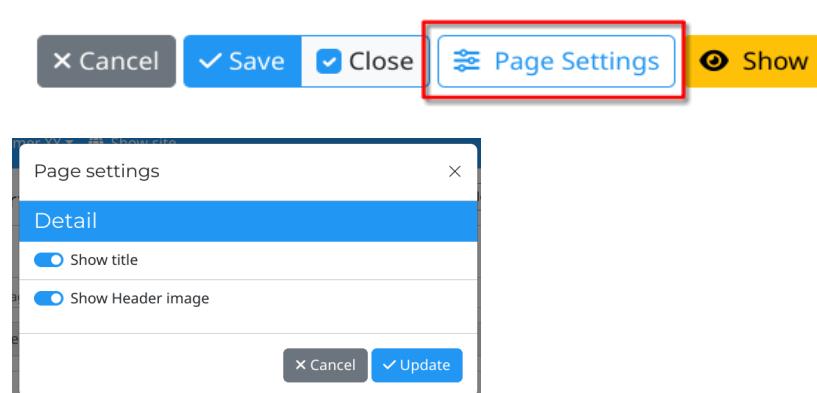

After confirming in the dialogue box, the item will be permanently deleted.

7.10 Import Article

You can import articles from previously exported .json files or restore individual articles from backups. Click the **Import** button to open the import dialog. Upload the desired .json file, and the articles will be imported automatically.

7.11 Page settings

Page settings can be adjusted during the editing process.

| | |
|-------------------|---|
| Show title | If checked, the title will be displayed in the detail view |
| Show Header image | If checked, the header image will be displayed in the detail view |

7.12 Version history

AveStream automatically saves a new version of your article to your local browser every time you save.

You can choose from the last 10 versions and restore any of them.

Please note that selecting a previous version will only restore the data in your edit-form; it will not automatically save it.

7.13 Content-Items

Customize the order of content items within each article.

Use the intuitive drag-and-drop interface to easily rearrange the display sequence.

7.13.1 General fields

All content elements share common fields for customizing their style and behaviour.

Position & Alignment

| | | |
|--------------|---|--|
| Above Start |  | The object will be shown left-aligned above text. This is the Default value |
| Above Center |  | The object will be shown centred above text. |
| Above End |  | The object will be shown right-aligned above text. |
| Below Start |  | The object will be shown left-aligned below text. This is the Default position |
| Below Center |  | The object will be shown centred below text. |
| Below End |  | The object will be shown right-aligned below text. |
| Start |  | The object will be shown left-aligned beside the text. |
| End |  | The object will be shown right-aligned beside the text. |
| Float Start |  | Positions the object at the start of the text flow, allowing text to wrap around it. |
| Float End |  | Positions the object at the end of the text flow, allowing text to wrap around it. |

Appearance

| | |
|--------------------|--|
| Layout | Select the desired layout for this element: Default: Standard container with space margins on both sides Fluid Content: Full width of the page with minimal padding Full Width: Full width of the page without padding |
| Layout CSS-Class | Add custom CSS classes for margin, padding and colour https://getbootstrap.com/docs/5.3/utilities/spacing/ |
| Show in Page-Index | Controls the visibility of the Header field within the Page Index (if available) (See 7.13.9) |

Access

| | |
|-----------|--|
| Publish | Select the date-time when this content will be made publicly visible |
| Is active | This content will be visible only if this checkbox is checked |

7.13.2 Text Element

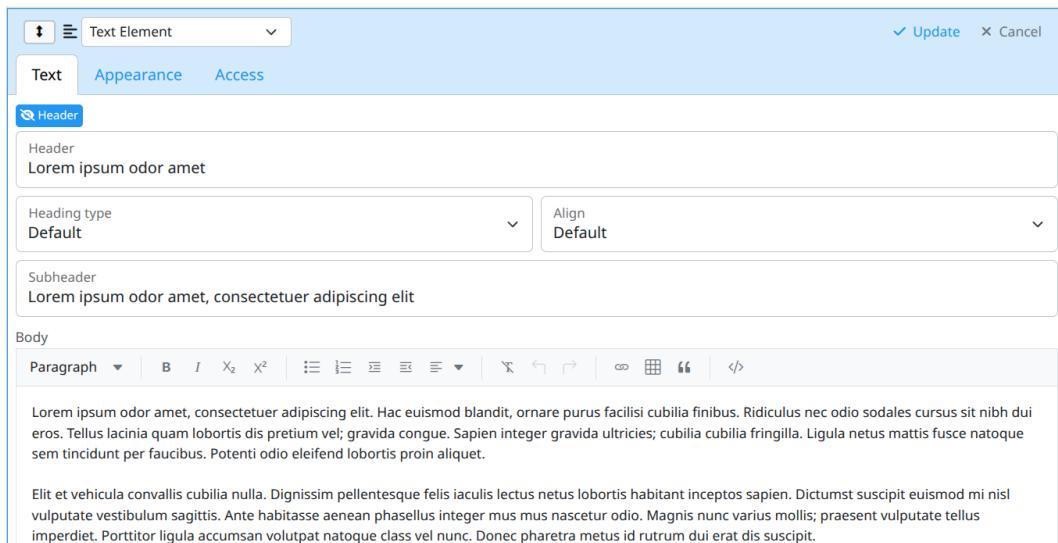

The Text Element allows you to create and format basic text content.

Generally

| | |
|-------------|--|
| Header | Enter the title for this Element |
| Header type | Select the desired headline size (h2 = largest, h6 = smallest, hidden = not visible) |
| Align | Align the headline (start, centre, end) |
| Subheader | Enter the subheader text. This header will be one headline size smaller than the main Header. |
| Body | Enter the main body text for this content using the basic editor, See 9.1 |

Appearance & Access

Lorem ipsum odor amet

Curae iaculis porttitor phasellus ipsum tempus suspendisse

Curae iaculis porttitor phasellus ipsum tempus suspendisse ex. Ligula nulla elementum litora aliquam posuere taciti. Dolor dapibus ante quam magnis euismod; ante lobortis maximus. Finibus arcu aliquet ipsum; donec mi nascetur. Enim luctus inceptos taciti pretium cursus. Erat non nisi aenean montes ultrices eros class dapibus massa. Fames pulvinar potenti platea volutpat vitae consectetur. Massa pellentesque curabitur magnis varius curae torquent erat sollicitudin. Etiam himenaeos augue lacinia est non dignissim quisque magnis.

7.13.3 Images

The Images content allows you to add multiple images to your article. You can optionally include accompanying text and control how the text wraps around the images.

Images

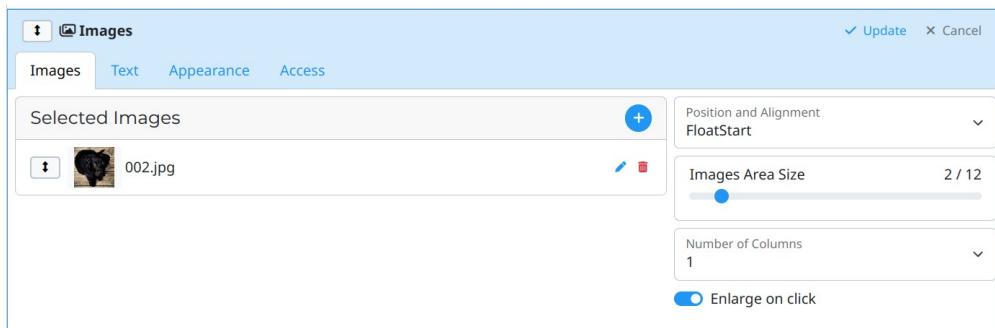

| | |
|----------------------|--|
| Filter by Tag | Select a tag from the dropdown to display images associated with this tag. Manual image selection will be disabled |
| Max. items | Limits the number of images shown (only applicable when a tag is selected in Filter by Tag) |
| Selected images | List of the selected images for this content. To add new images, click the Add button and open the File Manager, See 9.4 |
| Position & Alignment | Defines how the images will wrap with the text, See 7.13.1 |
| Images Area Size | Defines the area that is taken up by the images |
| Number of Columns | Defines how many columns will be used to display the images |
| Enlarge on click | Opens a lightbox of the clicked image, See 9.5 |

Text

| | |
|-------------|--|
| Header | Enter the title for this Element |
| Header type | Select the desired headline size (h2 = largest, h6 = smallest, hidden = not visible) |
| Align | Align the headline (start, centre, end) |
| Subheader | Enter the subheader text. This header will be one headline size smaller than the main Header. |
| Body | Enter the Body text for this content using the basic editor, See 9.1 |

Appearance & Access

Read more about the general fields here 7.13.1

7.13.4 Video

The Video content allows you to add a single video to your article. You can optionally include accompanying text and control how the text wraps around the video.

Video

| | |
|--|--|
| Video source | Select the source of the video: File: Upload a video directly from your storage. Click the Choose/Upload button to select a video file from your file manager. External: Enter the URL of the YouTube or Rumble video you want to use for this content. After changing the URL, the system will attempt to retrieve the necessary information to display the video. Media Archive: Select an existing video from your media-archive |
| Video embedded (Media Archive only) | If this option is enabled for a video from your Media Archive , the video will be embedded directly onto the page within an iframe |
| Video is vertical | When enabled, the video will be displayed in a vertical format, optimized for platforms like YouTube-Shorts and TikTok. |
| Position & Alignment | Defines how the video will wrap with the text, See 7.13.1 |
| Video Size | Defines the area that is taken up by the video |

Text

| | |
|-------------|--|
| Header | Enter the title for this Element |
| Header type | Select the desired headline size (h2 = largest, h6 = smallest, hidden = not visible) |
| Align | Align the headline (start, centre, end) |
| Subheader | Enter the subheader text. This header will be one headline size smaller than the main Header. |
| Body | Enter the Body text for this content using the basic editor, See 9.1 |

Appearance & Access

7.13.8 Menu

The Menu content element enables you to create a custom navigation within your article, allowing readers to easily navigate between different sections or related content.

Menu

| | |
|-------------------------------------|--|
| Display as | Determines how the Menu will be presented |
| Read-More label | Sets the text for the Read More link (for Card and Fancy Card views only) |
| Aspect ratio (Carousel only) | Sets the aspect ratio of the Carousel |
| Animation (Carousel only) | Select the animation for carousel transitions. Slide: New items slide in from the side Fade: New items cross-fade |
| Interval seconds (Carousel only) | Sets the duration (in seconds) each carousel item is displayed before transitioning to the next. The interval starts only after the user's first interaction with the carousel, unless Autoplay is enabled. |
| Autoplay (Carousel only) | Enables automatic carousel playback upon loading |
| Selected Articles | Choose the articles to be displayed in the Menu |
| Position & Alignment | Controls how the Menu interacts with surrounding text, See 7.13.1 |
| Menu Area Size | Determines the overall space allocated for the Menu |
| Number of Columns | Defines the number of columns used to display the Menu (for Card and Fancy Card views only) |
| Display options | Select which elements to show (title, content, date, author, button) (for Card and Fancy Card views only) |

Text

| | |
|-------------|--|
| Header | Enter the title for this Element |
| Header type | Select the desired headline size (h2 = largest, h6 = smallest, hidden = not visible) |
| Align | Align the headline (start, centre, end) |
| Subheader | Enter the subheader text. This header will be one headline size smaller than the main Header. |
| Body | Enter the Body text for this content using the basic editor, See 9.1 |

Carousel

7.13.9 Page-Index

The page-index content allows you to generate an index of all other contents within an article. Based on the Header Type (e.g., H2, H3, H4), it will automatically create a hierarchically structured index.

You have the option to exclude specific contents from appearing in the index.

When an item in the index is clicked, the page will smoothly scroll to the corresponding headline within the article.

7.13.10 Article List

The Article content element displays a list of articles. Users can click on an article to read it in full.

Article

| | |
|-----------------------------|---|
| Display as | Defines how the articles will be presented |
| Related article | Enable this to automatically display the first set of related articles based on the current article's categories or keywords. When enabled, the Data Source and Filter by tag selection options will be unavailable. |
| Data source | Choose a data source from the available options. After selecting a data source, define the range of items to use with the Range from and Range to fields. Read more about Data-Source 7.13.29 Note: Filtering by tag , Page size and Max. items will not be available if a data-source is selected. |
| Filter by tag | Refine the list of articles by selecting specific tags |
| Page size | Sets the number of items displayed per page for pagination |
| Max. items | Limits the number of articles displayed in the list |
| Show the Anniversary slider | This checkbox is visible only when Display is set to Anniversary If checked, allows users to change the date using a slider. |
| Position & Alignment | Controls how the articles interact with surrounding text, See 7.13.1 |
| Article Area Size | Determines the overall space allocated for the displayed articles. |
| Number of Columns | Defines the number of columns used to display the articles |
| Display options | Select which elements to show (title, content, date, author, button) |

Text

| | |
|-------------|--|
| Header | Enter the title for this Element |
| Header type | Select the desired headline size (h2 = largest, h6 = smallest, hidden = not visible) |
| Align | Align the headline (start, centre, end) |
| Subheader | Enter the subheader text. This header will be one headline size smaller than the main Header. |
| Body | Enter the Body text for this content using the basic editor, See 9.1 |

Labels

7.13.15 Plain HTML

The Plain-HTML content allows you to add custom HTML code for individual and extended functionality. This provides flexibility for implementing unique features or integrating with external services.

HTML

| | |
|-------------|--|
| Header | Enter the title for this Element |
| Header type | Select the desired headline size (h2 = largest, h6 = smallest, hidden = not visible) |
| Align | Align the headline (start, centre, end) |
| Subheader | Enter the subheader text. This header will be one headline size smaller than the main Header. |
| HTML | Enter the HTML for this content |

Appearance & Access

Read more about the general fields here 7.13.1

The screenshot shows the configuration interface for Plain HTML. At the top, there are tabs for 'HTML', 'Appearance', and 'Access'. The 'HTML' tab is selected. Below the tabs, there is a section titled 'Header' with a 'Header' button. The main area contains the following HTML code:

```
HTML
<div class="row">
<div class="col-md-8 bg-warning p-2">
<h2 class="m-0">col 8</h2>
</div>
<div class="col-md-4 bg-info p-2">
<h2 class="m-0">col 4</h2>
</div>
</div>
```

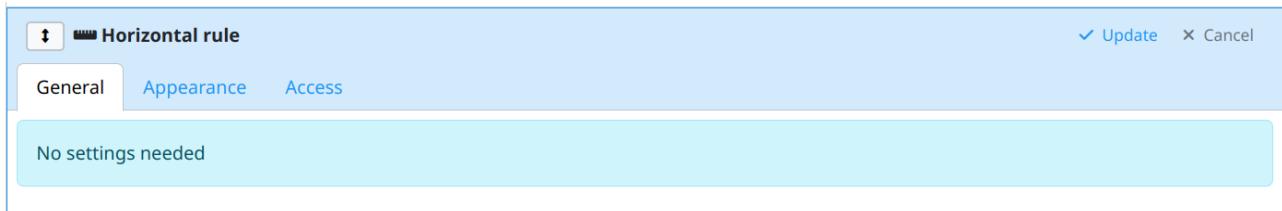

Below the code, there is a preview area showing two colored boxes: a yellow box labeled 'col 8' and a blue box labeled 'col 4'.

7.13.16 Horizontal rule

The Horizontal Rule content allows you to add a visual divider across the page, effectively separating distinct sections or content blocks.

Appearance & Access

Read more about the general fields here [7.13.1](#)

7.13.17 Form

The Form content element allows you to create comprehensive contact forms to gather user information.

You can add multiple finishers to define the actions that occur when the user submits the form.

Form Builder

| | |
|--------------|--|
| Submit label | Sets the text for the submit button |
| Alignment | Controls the alignment of the form within its container |
| Area Size | Determines the overall space allocated for the form |
| Elements | <p>Define the fields to be used in your form Add new fields by selecting the input type from the drop-down:</p> <p>Form grid: Arrange fields in a grid layout Label: Displays a label only Text: Input for single-line text Password: For entering passwords securely Email: For entering valid email addresses Phone number: For entering phone numbers URL: For entering URLs Number: For entering numerical values Date: For selecting a date Textarea: For entering multi-line text Checkbox: A simple on/off option Select: Creates a dropdown list with multiple options Captcha: Displays a CAPTCHA image to verify human interaction Hidden: A hidden field that cannot be edited by the user (Often used for tracking form submissions)</p> |
| Finishers | <p>Define the actions that occur after the user submits the form Add new finishers by selecting one from the drop-down:</p> <p>Email: Specify the recipient email address and subject template Redirect: Redirect the user to a specified URL Message: Display a custom message to the user after submission, with a button to return to the form</p> |

7.13.23 Stream

Use the Stream content element to display a collection of stream entries.

Streams

| | |
|----------------------|--|
| Filter by tag | Filter the items by keyword or category |
| Max. Items | Limits the number of streams displayed |
| Position & Alignment | Defines how the streams will wrap with the text, See 7.13.1 |
| Area Size | Defines the area that is taken up by the streams |
| Number of Columns | Defines how many columns will be used to display the streams |

Text

| | |
|-------------|--|
| Header | Enter the title for this Element |
| Header type | Select the desired headline size (h2 = largest, h6 = smallest, hidden = not visible) |
| Align | Align the headline (start, centre, end) |
| Subheader | Enter the subheader text. This header will be one headline size smaller than the main Header. |
| Body | Enter the Body text for this content using the basic editor, See 9.1 |

Labels

| | |
|----------------|--|
| No-items label | Message to display when no streams are found |
|----------------|--|

Appearance & Access

Lorem ipsum odor amet, consectetuer adipiscing elit. Malesuada quis platea torquent natoque mus? Vel tempor phasellus aptent sodales litora platea platea. Condimentum sem lobortis per aliquam fames ipsum mollis suspendisse. Congue venenatis aliquam amet etiam tempus! Pharetra per dapibus enim non vivamus porttitor, urna facilisi tempor. Tempor per pellentesque himenaeos auctor lacus malesuada lacinia eu.

7.13.24 Program

The Program content allows you to display a list of program items.

Program

| | |
|---------------|--|
| Display as | Defines how the programs will be presented |
| Program Start | <p>Defines how the programs will be listed:</p> <p>Coming Program Items: Lists all programs based on their Start Date.</p> <p>Note: Programs running for multiple days will only appear on their start date.</p> <p>Not-Ended Program Items: Lists programs that have not yet finished.</p> <p>Note: A Category selection is required for this filter to work.</p> |
| Filter by tag | Filter the items by keyword or category |
| Item count | Sets the number of items displayed (Ticker only) |
| Days offset | Specify the number of days from today to begin displaying the program. Use 0 for today, negative numbers for past days. |
| Alignment | Controls the alignment of the programs within its container |
| Area Size | Defines the area that is taken up by the programs |

Labels

| | |
|-----------------|--|
| No-items label | Message to display when no streams are found |
| Load-more label | Sets the text for the Load-more button |

Appearance & Access

Read more about the general fields here 7.13.1

The screenshot shows the configuration interface for the 'Program' content type. The 'Program' tab is active. The 'Display as' dropdown is set to 'List'. The 'Alignment' dropdown is set to 'Center'. The 'Filter by tag' dropdown shows 'All items (No filter set)'. The 'Area Size' slider is at 12/12. The 'Days offset' input field is set to 0. At the top right, there are 'Update' and 'Cancel' buttons.

7.13.25 Media archive

The Media archive content allows you to display a list of Media archive items.

Media archive

| | |
|----------------------------------|---|
| Display as | Defines how the media archives will be presented List: Displays archives in a simple, sequential list Card: Presents archives as individual, visually appealing cards Accordion: Organizes archives by category within expandable sections. Note: Only archives with a category will be displayed Carousel: Shows the videos in a carousel Anniversary: Shows the videos having the keyword for today Extended Player: Special element that shows a list of related videos on the side of the video-player |
| Aspect ratio (Carousel only) | Sets the aspect ratio of the Carousel |
| Animation (Carousel only) | Select the animation for carousel transitions. Slide: New items slide in from the side Fade: New items cross-fade |
| Interval seconds (Carousel only) | Sets the duration (in seconds) each carousel item is displayed before transitioning to the next. The interval starts only after the user's first interaction with the carousel, unless Autoplay is enabled. |
| Autoplay (Carousel only) | Enables automatic carousel playback upon loading |
| Filter by tag | Filter the items by keyword or category |
| Page size | Sets the number of items displayed per page for pagination |
| Max. items | Limits the number of items displayed in the list |
| Alignment | Controls the alignment of the media archives within its container |
| Area Size | Defines the area that is taken up by the media archives |
| Number of Columns | Defines how many columns will be used to display the media archives (Card, Accordion and Anniversary only) |
| Toolbar | Choose which controls appear on the toolbar: Show list/grid switch: Enable users to toggle between list and grid layouts Show Search Field: Display a search bar for quick content searches (Accordion only) |
| Display options | Select which elements to show (title, content, date, button) |

Appearance & Access

7.13.29 Data-Source

Using a page-wide data source lets you centralize your data and reuse it across multiple content elements. For example, you can use the same data source for a list of items and other related content.

Data-Source

| | |
|-------------------|---|
| Key | Enter a unique key to identify this data source |
| Data Type | Select the data type for this source |
| Data-Source items | Use this section to combine multiple keyword filters into a single, unified data source |

Here is a list of content elements that supports the consumption of this data-sources:

Article list 7.13.10

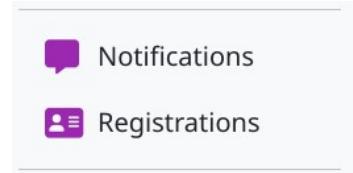

7.13.30 Search Sitemap

This content type adds a **hidden sitemap** on this article. This sitemap is exclusively for search engines like Google and Bing, helping them to effectively index all your blog posts and shop products.

For more informations about the search sitemap read section 10.3

8 Push-Notifications

This section allows you to manage all the entities used for sending push notifications.

8.1 Notifications

The Notifications section allows you to view past notifications and create new ones.

| Notification | | | | | | | |
|--------------|------------|-------------|-----------------------------|-----|-------------|---------|------|
| Actions | Community | Title | Body | URL | Created | Success | Fail |
| | customerxy | Lorem ipsum | Lorem ipsum odor amet, c... | | 12:48 today | 1 | 1 |

The list displays key information such as title, body, creation date, and send status.

8.1.1 Add notification

Create a new notification by clicking "Add".

Image

 customerxy/002.jpg

URL to open

Open externally

| | |
|-----------------|--|
| Community | Select the specific community or group of users to receive this notification |
| Title | The subject of the notification that will be displayed to users |
| Body | The main message content of the notification |
| Image | An optional image to be included with the notification |
| URL to open | The web address that will be opened when a user taps the notification |
| Open externally | If checked, the specified URL will be opened in the user's default web browser outside of the mobile app |
| Preview | <p>This section provides a visual preview of how the notification will look</p> <p>Note: This preview may not perfectly reflect the actual appearance of the notification on a user's device.</p> |

8.2 Registrations

The Registration section allows you to manage push notification registrations.

| Registrations | | | | | | | |
|---------------|----------------|-------------|--------|-----------------------------|-------------|---------|--------|
| Actions | InstallationId | Communities | Device | ProviderToken | Created | Deleted | Failed |
| | ██████████ | ██████ | | dNArKTRiRV2C9J1_6xoK33.... | 12:15 today | 1 | |
| | ██████████ | ██████ | | fVWsZn0dTraLSX-A78IIIn:A... | 12:15 today | 0 | |

The list displays key information such as installation, token, creation date and status.

8.2.1 Delete Registrations

To delete a registration, click the **Delete** button.

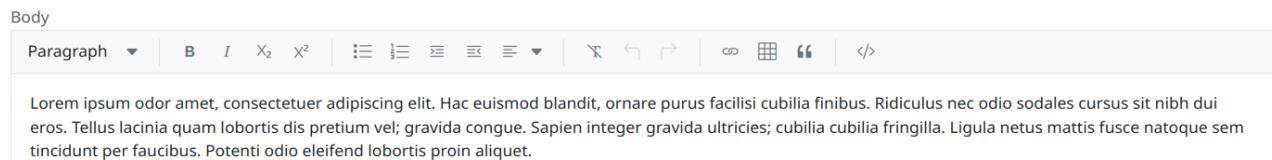

After confirming in the dialogue box, the registration will be permanently deleted.

9 UI-Elements

This section provides help for reusable elements, which are designed for use in multiple locations within AveStream.

9.1 Basic Editor

The Basic editor is suitable for a wide range of applications, allowing you to easily apply fundamental text formatting.

| | |
|-----------------------------------|---|
| Paragraph (dropdown) | Modify text formatting (e.g., to paragraph, heading) |
| B I X ₂ X ² | Modify text emphasis (e.g., bold, italics) |
| ⋮ ⋮ ⋮ ⋮ | Manage lists (bulleted, numbered) and adjust indentation |
| ≡ (dropdown) | Modify paragraph alignment |
| X | Clear text formatting |
| ↶ ↽ | Undo and Redo previous actions |
| 🔗 | Insert links. A modal window will open, allowing you to specify the link type. If the selected text is an email address, the Email tab will be pre-selected. |
| grid | Add a simple table to your document. Specify the desired number of columns and rows. A toolbar will appear within existing tables, allowing you to customize table settings |
| “” | Format the current paragraph as a block quote |
| ⟨⟩ | Display the editor content as HTML code |

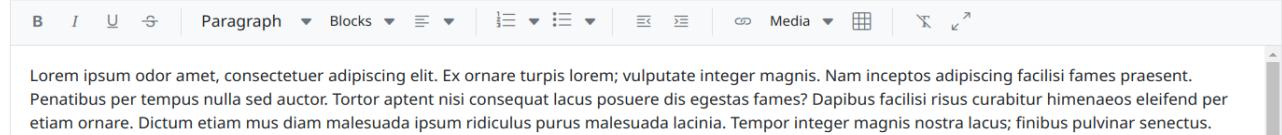

9.2 Full Editor (Deprecated)

The Full Editor content element is a versatile tool that allows you to insert a wide range of elements within a single editor.

Important Note:

This editor is deprecated and is only available for previously imported pages.

Body text </> RAW

Toolbar icons: B (Bold), I (Italic), U (Underline), Paragraph (dropdown), Blocks (dropdown), Alignment (dropdown), Lists (dropdown), Media (dropdown), Table (grid icon), Clear (X), and Full-screen (F icon).

Text area content: Lorem ipsum odor amet, consectetuer adipiscing elit. Ex ornare turpis lorem; vulputate integer magnis. Nam inceptos adipiscing facilisi fames praesent. Penatibus per tempus nulla sed auctor. Tortor aptent nisi consequat lacus posuere dis egestas fames? Dapibus facilisi risus curabitur himenaeos eleifend per etiam ornare. Dictum etiam mus diam malesuada ipsum ridiculus purus malesuada lacinia. Tempor integer magnis nostra lacus; finibus pulvinar senectus. Finibus mi eleifend a dolor class mollis suspendisse commodo.

| | |
|---|---|
| B <i>I</i> X₂ X² | Modify text emphasis (e.g., bold, italics) |
| Paragraph ▾ | Modify text formatting (e.g., to paragraph, heading) |
| Blocks ▾ | Select a block to insert. Manage the list of available blocks in customer settings here 4.2.10 |
| ☰ ▾ | Modify paragraph alignment |
| ☰ ☰ ☳ ☴ ☵ | Manage lists (bulleted, numbered) and adjust indentation |
| 🔗 | Insert links. A modal window will open, allowing you to specify the link type. If the selected text is an email address, the Email tab will be pre-selected. |
| Media ▾ | Insert Media: Select Image, Video or Audio. This will open the File Manager 9.4, where you can upload or select an existing file to insert into your content. |
| grid | Add a simple table to your document. Specify the desired number of columns and rows. A toolbar will appear within existing tables, allowing you to customize table settings |
| X | Clear text formatting |
| fullscreen | Toggle full-screen mode to maximize the editing area |

9.3 Filter dialogue

The Filter dialogue allows you to refine your search results by filtering by title or tag. The Filter dialogue is available for Articles and Media Archives.

After applying the filter, the list will be refreshed to display only the items that match your criteria. Depending on the application, you may see various action buttons.

9.3.1 Search items

| | |
|---------|-------------------------------------|
| Edit | Allows you to modify the item |
| Preview | Opens the selected item for viewing |

9.3.2 Select item

| | |
|---------|---|
| State | If an item is selected, the item will have a background color |
| Preview | Opens the selected item for viewing |

9.3.3 Batch actions

When you open the Filter dialogue in **Media-Archive**, you can manage multiple items simultaneously using batch actions.

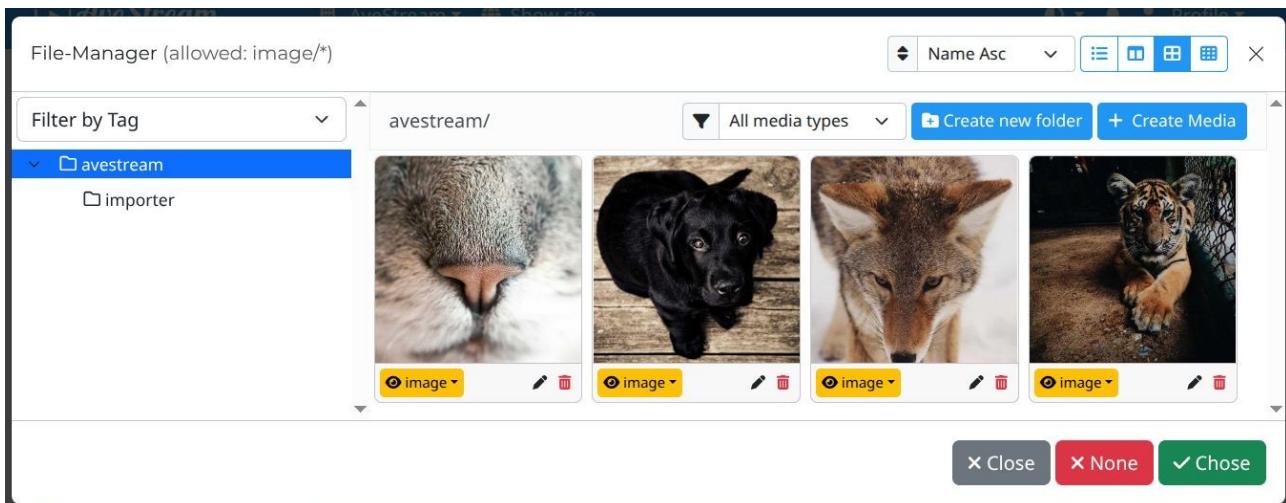

Choose the items you wish to update from the list. You can quickly select or deselect all items by checking or unchecking the **All** checkbox.

Once at least one item is selected, the **Batch Actions** dropdown menu will become active. From this menu, select the desired action:

| | |
|------------|--|
| Activate | Make the selected items active |
| Deactivate | Make the selected items inactive |
| Add Tag | Apply a new tag to the selected items |
| Remove Tag | Remove an existing tag from the selected items |
| Delete | Permanently remove the selected items |

9.4 File-Manager

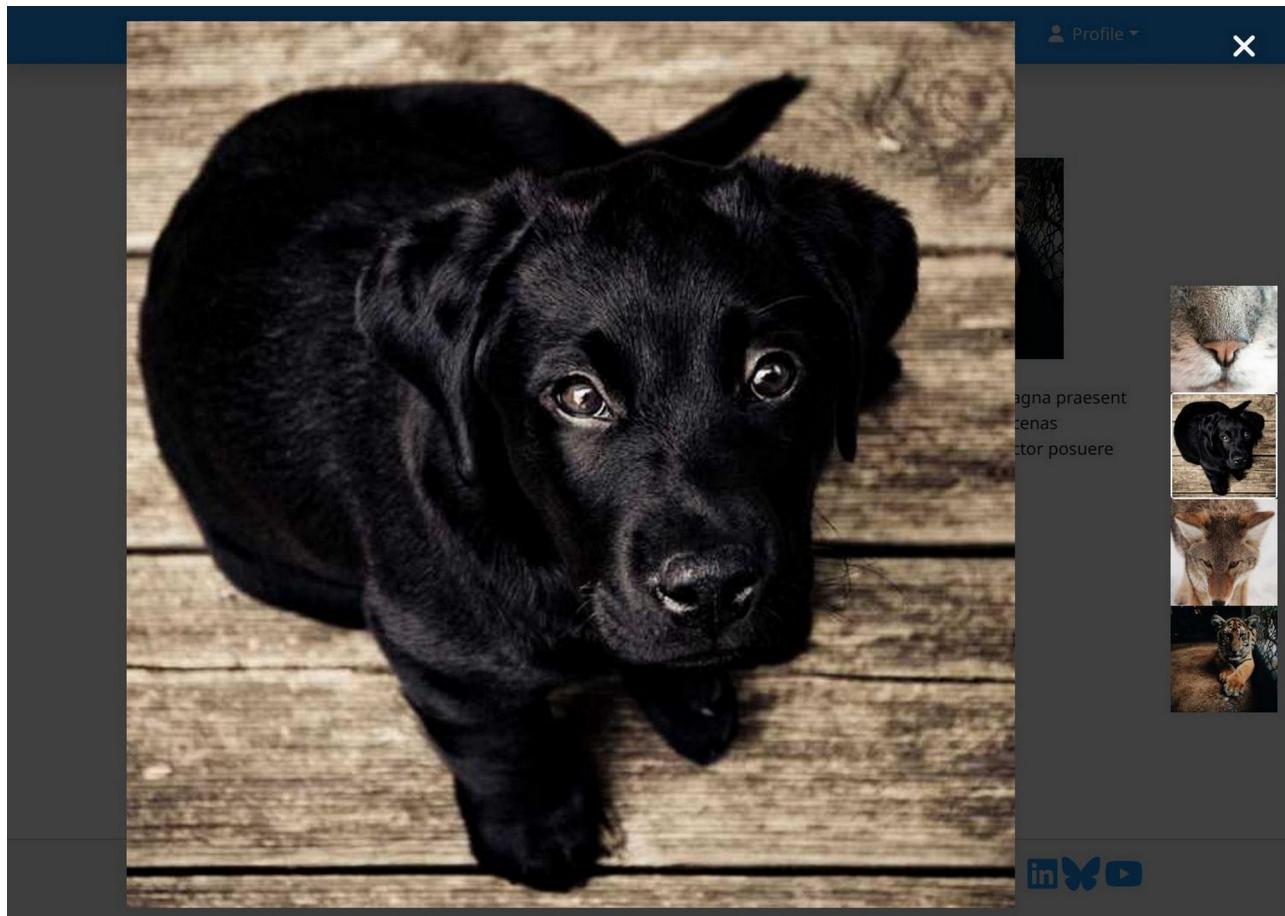

The File Manager mirrors the functionality of the Media Section, but operates within a dialog and restricts file selection to specific types based on the current context. Refer to the Media Section for a comprehensive list of features 5

9.5 Lightbox

When "Enlarge on click" is activated for images, a lightbox will be displayed in the frontend. Users can click on an image, and the lightbox will appear, showcasing the enlarged image.

If the image content contains multiple images, the lightbox will also display thumbnails of all available images, allowing users to easily switch between them.

10 Troubleshooting

10.1 Unhandled error occurred

Here's what you can do:

10.1.1 Reload Page

Often, a simple page reload is all it takes to resolve minor errors. It's the most straightforward first step.

10.1.2 Hard Reload (Clear Cache & Reload)

If the error continues, the problem could be related to your browser's cached data. A **hard reload** forces the browser to re-download all page elements, bypassing the cache. Use these shortcuts:

Windows/Linux: CTRL + Shift + R

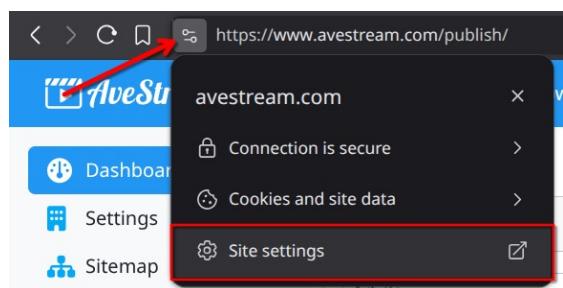

Mac Cmd + Option + I

10.1.3 Clear Site-Cache

If the error keep getting back even after you dismissed the cache, then please clear the browser cache for this site.

Chrome/Brave:

Click the **Site information** button in your address bar and select **Site settings**.

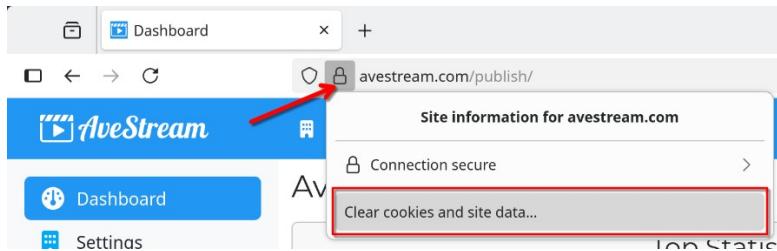

Click the **Delete data** button, then confirm by clicking **Delete** in the dialog.

Reload the page. **You'll need to log in again** as this process removes all cookies.

Firefox:

Click the **Verified** button in your address bar and select **Clear cookies and site data**.

Confirm by clicking **Remove** in the dialog.

Reload the page. **You'll need to log in again** as this process removes all cookies.

10.2 Debug back end response

To debug the responses from the PWA, add `?debug=true` to the URL and press Enter.

This will display all responses made by the PWA in your browser's console.

10.3 Search-bot sitemap

To simulate the export of the search-sitemap, append `?searchenforced=true` to the Home-URL in the frontend.

Note: This simulation only affects the pre-rendered output. When inspecting the HTML, the links will not be visible as the circuit has already updated the DOM.

To view the pre-rendered output with the simulated search-sitemap, append the `?searchenforced=true` parameter to the URL and then right-click and select **View Page Source**.

10.4 Open page for in-app-browser

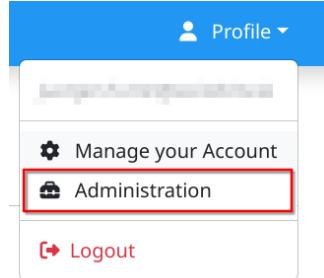

To open a webpage inside a mobile app without header and footer, you have to place **mobile-app** after the customer segment.

For example: `/avestream/blogs` will become `/avestream/mobile-app/blogs`

11 Administration

The Admin console provides administrative functions, including backups and user account management.

Access the Admin console through the profile dropdown menu after successful login.

11.1 Backup

Under the Backup tab you will find a dropdown with all associated customers to your login.

After you select a customer from the dropdown a list with stored backups will be visible in a list

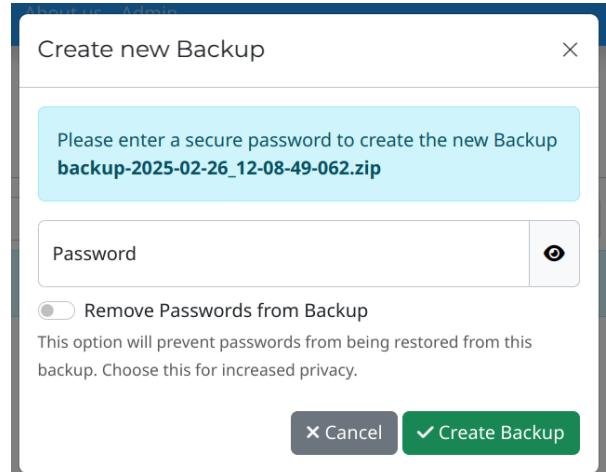

The screenshot shows a 'Manager' interface with a 'Backups' tab selected. There are tabs for 'Backups', 'Users', and 'Customers'. Below the tabs is a dropdown menu showing 'avestream'. To the right are 'Refresh' and '+ Create new Backup' buttons. The main table has columns for 'Actions', 'Path', and 'Content-Type'. One row is shown: a trash icon, 'backup-2025-02-26_11-51-00-049.zip', and 'application/octet-stream'.

11.1.1 Create new Backup

To create a new backup, click **Create new Backup**. A modal window will appear.

Enter a password to secure the backup. **Important:** If you forget this password, the backup will be permanently inaccessible.

If you choose **Remove Passwords from Backup**, all configuration passwords will be excluded and cannot be restored.

11.1.2 Download Backup

Clicking on the backup's name initiates the download of the backup file to your computer.

11.1.3 Delete Backup

To delete a backup, click the trash icon next to it. After confirmation, the backup will be permanently deleted.

11.1.4 Backup Automation

The backup creation process can be automated for regular backup creation purposes, e.g. from some server scripts, cron jobs etc.

11.1.4.1 URL endpoints

- *StartBackupJob*

<https://www.avestream.com/api/Automation/StartBackupJob?apiKey=YOUR-KEY&customerId=YOUR-CUSTOMER-ID&backupId=YOUR-BACKUP-ID&backupPwd=YOUR-PASSWORD>

- *IsBackupJobFinished*

<https://www.avestream.com/api/Automation/IsBackupJobFinished?customerId=YOUR-CUSTOMER-ID&apiKey=YOUR-KEY&backupId=YOUR-BACKUP-ID>

- *Finished backup file for downloading*

<https://avestreamlive.blob.core.windows.net/customers-backups/YOUR-CUSTOMER-ID/backup/YOUR-BACKUP-ID.zip>

The backup-process is initiated by *StartBackupJob*, which returns (when succeeded) with 202, returning the *IsBackupJobFinished* URL, so you can check the backup-job progress in your script.

The automated backup process looks like this:

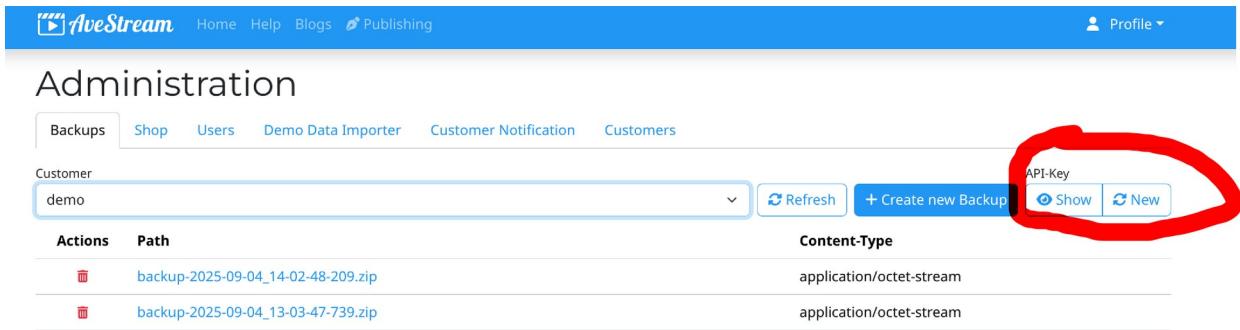

1. Call *StartBackupJob* to initiate the backup process on the server; when 202 is received, it's successfully running on the server, which can take a few minutes (hours?) to complete, based on the data you have stored in your account
2. While the process is running, you can regularly check for the progress with *IsBackupJobFinished* until you get a 200 "true" back from the server; as it still runs, you'll receive a 202 "false". Please let some time between the checks, like 1 minute, to avoid unnecessary server load
3. When 200 "true" is received, you can download the .zip file and use it locally on your system

11.1.4.2 URL parameters

- YOUR-KEY is your API-key (see below)
- YOUR-CUSTOMER-ID is the ID of your customer-account in AveStream
- YOUR-BACKUP-ID is the name of the backup-file, which will be created; e.g. when you put "abc-2025-09-05" here, you'll later be able to download it as file "abc-2025-09-05.zip"
- YOUR-PASSWORD is your zip password to protect the created zip-backup file with it – what you set here, must be used later to decompress the .zip file

11.1.4.3 API-Key

- Is used to protect your customer API automation access
- Can be shown and reset in the Administration web page here:

The screenshot shows the AveStream Administration interface. At the top, there is a navigation bar with links for Home, Help, Blogs, Publishing, and Profile. Below the navigation bar, the page title is 'Administration'. Under the title, there is a sub-navigation bar with tabs for Backups, Shop, Users, Demo Data Importer, Customer Notification, and Customers. The 'Backups' tab is selected. A dropdown menu for 'Customer' is open, showing 'demo' as the selected item. On the right side of the page, there is a section titled 'API-Key' with two buttons: 'Show' and 'New'. The 'New' button is highlighted with a red circle. Below this section, there is a table with two rows of backup data. The columns are 'Actions', 'Path', and 'Content-Type'. The first row shows 'backup-2025-09-04_14-02-48-209.zip' with 'application/octet-stream' as the Content-Type. The second row shows 'backup-2025-09-04_13-03-47-739.zip' with the same Content-Type.

| Actions | Path | Content-Type |
|---------|------------------------------------|--------------------------|
| | backup-2025-09-04_14-02-48-209.zip | application/octet-stream |
| | backup-2025-09-04_13-03-47-739.zip | application/octet-stream |

- When compromised, you can safely reset the key with the “New” button (don’t forget to put the new API-key into your scripts!)

11.1.4.4 Security notes

- The API-key is your own key; don’t give it to anybody and regenerate it regularly or when the exposure is suspected
- Always use a random backup-id, like new GUID or at least timestamp containing seconds/milliseconds, as the zip-downloading URL is fixed and can’t be protected with the API-key
- Potential attacker has to know your backup-id to be able to download your zip-file and also a the zip-password for decompressing it
- Delete your backup files regularly in the Administration page
- Rotate your zip-password regularly or when the exposure is suspected + use a safe password (e.g. 10+ strong-password characters): when the attacker gets your zip-file, he can’t use it anyway

11.2 Users

Under the **Users** section, you can control which users have access to your customers.

| Actions | Email | Full name | Email confirmed |
|---------|--------------------|---------------|-----------------|
| | demo@avestream.com | Demo Customer | True |

11.2.1 Link existing User

To manage access for a specific customer:

- Select the desired customer from the dropdown menu
- You will then see a list of users who currently have access to that customer
- To remove a user's access, click the **Unlink** button next to their name and confirm the removal

To grant access to an existing AveStream user:

- Click the **Link Existing User** button
- Enter the user's email address
- Click **Add user**

11.2.2 Add user (Global Admin only)

If you have **Global Admin** privileges, you'll see an additional button to **Add new user**.

Clicking this button will bring up a form where you can enter the new user's details:

| | |
|------------------|---------------------------------|
| Username / Email | Must be a valid email address |
| Password | Enter the new user's password |
| First name | Enter the new user's first name |
| Last name | Enter the new user's last name |

The newly created user will be automatically linked to the currently selected customer.

11.3 Demo Data Importer

In the Demo Data Import section, you can import demo data to a selected customer.

The screenshot shows the 'Demo Data Importer' section of the AveStream interface. It has two main sections: 'Import Blogs' and 'Import Images'. Each section contains four input fields: 'Page size' (set to 10), 'Page index' (set to 0), 'Image' (set to 'Picsum'), and 'Width' (set to 1024) and 'Height' (set to 576). Below each section is a progress bar and a blue 'Import' button with a file icon.

11.3.1 Import Blogs

This feature allows you to import sample blog posts from dummyjson.com

| | |
|------------|--|
| Page size | Specify the number of blogs to import per page |
| Page index | Enter the page number to import (starting with 0 for the first page) |
| Image | <p>Choose the source for blog images:</p> <p>None: No images will be imported</p> <p>Picsum: Downloads images from picsum.photos (https://picsum.photos/images) using the blog ID</p> <p>Text: Generates an image with the blog title as text on a random background color (https://dummyjson.com/docs/image)</p> |
| Width | Set the desired width of the imported images |
| Height | Set the desired height of the imported images |

11.3.2 Import Shop Products

This feature allows you to import sample shop products from **dummyjson.com**

| | |
|------------|---|
| Page size | Specify the number of blogs to import per page |
| Page index | Enter the page number to import (starting with 0 for the first page) |
| Image | Choose the source for blog images: None: No images will be imported Picsum: Downloads images from picsum.photos (https://picsum.photos/images) using the blog ID Text: Generates an image with the blog title as text on a random background color (https://dummyjson.com/docs/image) |
| Width | Set the desired width of the imported images |
| Height | Set the desired height of the imported images |

11.3.3 Import Images

This feature lets you import sample images from **picsum.photos** o **dummyjson.com**

| | |
|------------|--|
| Page size | Specify the number of images to import per page |
| Page index | Enter the page number to import (starting with 0 for the first page) |
| Image | Choose the source for blog images: Picsum: Downloads images from picsum.photos (https://picsum.photos/images) using the blog ID Text: Generates an image with the blog title as text on a random background color (https://dummyjson.com/docs/image) |
| Width | Set the desired width of the imported images |
| Height | Set the desired height of the imported images |

12 Glossary

| Term | Definition |
|---------------------------------|---|
| Frontend | Encompasses all client-facing projects, including the Admin Console, Manager Console, and web page presentation. |
| Backend | Represents the core server infrastructure, handling all server-side logic and data processing. |
| Publisher-Console | Empowers authorized customers to manage website content and configuration, including articles, settings, and styles, to control the visitor experience. |
| Admin-Console | Provides additional administrative functions for authorized customers, such as managing backups and user accounts. |
| Webpage | Displays content to both authorized and unauthorized visitors. |
| Customer | AveStream clients with varying roles (e.g., administrators, users), each granted specific access and functionality. |
| Visitor | Individuals who access and view web page content, regardless of authentication status. |
| Content Management System (CMS) | Serves as an intermediary between customers and visitors, streamlining content creation and delivery for optimal presentation. |
| Web API | Enables communication between applications over the internet. It allows software to access and exchange data or functionality from web servers and web browsers. |
| Web scraping | The automated process of extracting data from websites. This involves retrieving the underlying HTML code of a webpage, parsing it, and then extracting specific information. |
| Article | A distinct unit of content within a web publication, such as a blog post or page. It is structured as a sequence of content elements. |
| Content Element | A modular component within an article, designed to display a specific type of data or content. |
